Subject: Update on Safety Policy BASF wrt truck drivers

Dear carrier,

Beginning of this year, we introduced a basic safety test for truck drivers in order to increase their knowledge and understanding of our site safety rules. In the past months, we have noticed a positive impact of this safety measure. **BASF wants to thank you for your commitment** concerning this important topic.

Nevertheless, safety remains priority one for BASF and therefore we want to emphasize several items:

- It is forbidden to bring passengers (such as children, pets,...) to our site. Only a second driver – who needs to register at gate 6 with his/her driver's license – is allowed. During this summer period, we have noticed a significant increase of drivers bringing passengers, especially **under-aged children that are left behind at the gate without adult supervision**. We cannot tolerate this and these **drivers will no longer be allowed on the BASF site**.
- Smoking (except in specific areas which are clearly indicated) is forbidden, **no exceptions are made for electronic cigarettes**.
- **Rail traffic always has priority**, please pay attention at the railway crossings.
- Concerning the parking outside gate 6:
 1. **The parking outside gate 6 can only be used during the time of check-in.**
 2. The parking can only be used for transports executed for activities on the site of BASF Antwerp (BASF, Styrolution, Eurochem, INOVYN Belgium, Air Liquide, Solvay Chemie, Evides and Electrabel).
 3. On weekdays between 22.30h and 05.00h and during the weekend, only unloaded vehicles with driver's supervision are allowed on our parking lot. In any event, parking of loaded vehicles is always forbidden.

In case you require any further clarification, please do not hesitate to contact us.

We want to thank you in advance to take appropriate action to inform your drivers (including your subcontractors) to avoid any further violations and incidents which result in the imposition of sanctions.
