## CORNWALL, ONTARIO

**Address:** 501 Wallrich Avenue, Cornwall, Ontario, Canada.

**Start of Production:** 1970

**Location:** Approximately 100 km west of Montréal-Pierre Elliott Trudeau International Airport.

**Site Manager:** Diana Rourke

**Number of Employees:** 30

### Products/Uses:

BASF Canada's Cornwall site manufactures monomeric and polymeric plasticizers that are distributed across North America and abroad. Customers use these products in conjunction with polyvinyl chloride to create finished products such as swimming pool liners, automobile interiors, wire insulation and packaging materials.

### Community Relations:

BASF is active in the Cornwall community, supporting science education, ecology, health and safety programs and other local community based initiatives through monetary donations and employee volunteer efforts. In 2015, BASF Canada announced plans to donate \$50,000, over five years, to the St. Lawrence College Cornwall Campus in support of the renovation of the school's chemistry laboratory. The company has also brought Kids' Lab, a series of hands-on chemistry workshops developed by BASF for children between the ages of 6-12, to students in the Cornwall community.

In 2013, the Cornwall site began using a new dry powder handling facility. This \$3.5 million investment enhances safety for our employees and reduces fork lift traffic at the plant, reducing noise.
