SASKATOON, SASKATCHEWAN

Address: 3835 Thatcher Avenue, Saskatoon, Saskatchewan, Canada.

Start of Production: 1988

Location: Approximately 6 km north of Saskatoon International Airport.

Site Manager: Mark Timbres

Number of Employees: 45

Products/Uses:

BASF Canada's Saskatoon site is dedicated to the research, development and production of seed (sterile peat) and soil (solid core granular) applied biological based Rhizobium/Bacillus inoculants for agricultural markets. Products from this location are produced for global markets.

Community Relations:

BASF is active in the Saskatoon community, supporting science education, ecology, health and safety programs and other local community based initiatives through monetary donations and employee volunteer efforts. In 2015, the site supported organizations including the Heart and Stroke Foundation, Saskatoon Food Bank & Learning Center and the MS Society of Canada.

The company has also brought Kids' Lab, a series of hands-on chemistry workshops developed by BASF for children between the ages of 6-12, to students in the Saskatoon community.
