MasterRoc BSB 755

Highly reactive, two component polyurethane foam for gas drainage drilling hole sealing.

**Product description**

MasterRoc BSB 755 is a two component, solvent-free polyurethane foam specifically designed for gas drainage drilling hole sealing.

**Fields of application**

- Sealing gas drainage drilling hole

**Features and benefits**

- Prepackaged two component system, no equipment required, easy to use
- Good fire resistance (MT 113-1995)
- Fast reaction
- Foaming expansion factor up to 15 times without being in contact with water
- Rapid strength development

**Storage**

If stored in dry conditions in unopened, tightly closed original containers and within a temperature range of +5°C and +35°C, the components of MasterRoc BSB 755 have a shelf life of 12 months.

**Safety precautions**

Avoid contact with skin and eyes by using the required personal protective equipment, such as overalls, gloves and safety glasses. If contact with skin occurs, wash thoroughly using soap and water. If contact with eyes occurs, rinse thoroughly with an eyebath filled with boracic solution and seek medical advice. Refer to the Material Safety Data Sheet for safety measures. The products are harmless.

Uncured products should be prevented from entering local drainage systems and water courses. Spillage must be collected using absorbent materials such as sawdust and sand, and disposed of in accordance with local regulations.
