MasterRoc® SLF 34
Soil conditioning foam for Tunnel Boring Machines

DESCRIPTION
MasterRoc SLF 34 is a foaming agent especially designed for soil conditioning in Shielded Tunnel Boring Machines.

RECOMMENDED FOR
• Soft ground tunnelling with Tunnel Boring Machines
• Dust suppression in Hard Rock tunnelling

FEATURES AND BENEFITS
• Improved soil behavior
• Easier ‘mucking’
• Environmentally friendly
MasterRoc SLF 34 has been especially developed for soil conditioning in tunnelling with shielded TBM excavation. Generally the product when mixed with the soil, provides for:
• Reduced permeability and increased sealing at the face
• Creation of plastic deformation properties in the soil, which provides an even and controlled support pressure and increased face stability
• Lower inner friction and lower abrasiveness of the soil at the cutter head through to the screw conveyor and conveyor. This reduces power consumption; enables soil extraction and conveyance, as well as reducing wear costs.
• Reduces stickiness in certain soils, which would lead to problems with blockage
• In hard rock tunnelling and mining it can be used for dust suppression

A foam is produced by dispersion of air into an aqueous solution of the MasterRoc SLF 34. MasterRoc SLF 34 foam solution can be expanded with air to produce a stable foam. The foam recipe, foam expansion and the foam injection rate into the face, working chamber or screw conveyor will depend on soil conditions encountered.

DOSAGE
Typically the MasterRoc SLF 34 is made into a 2 – 3% (typical range 2 – 6%) solution in water. MasterRoc SLP 1 or MasterRoc SLF 2 (see separate data sheets) can be added with the MasterRoc SLF 34 to strengthen the foam or adjust the properties of the excavated soil.

SHELF LIFE
The storage temperature of MasterRoc SLF 34 is between 5°C and 35°C. If stored in original tightly closed containers MasterRoc SLF 34 will have a shelf life of 12 months. Do not allow the product to freeze. It is recommended that your local UGC representative be consulted prior to the use of any product that has become frozen.

PACKAGING
MasterRoc SLF 34 is available in standard 200 litre drums. Bulk tanker or 1000 litre polytank supply is available on request.

PRECAUTIONS
MasterRoc SLF 34 contain no hazardous substances requiring labeling. However, standard precautions for handling chemical products should be observed: Avoid eye and skin contact and wear rubber gloves and goggles. If contact occurs, rinse with plenty of water. In case of eye contact seek medical advice. For further
