BASF Kids' Lab sparks curiosity and inspires "Clever Foodies" in Singapore

- **Around 200 children learned how science can support informed, healthier choices through hands-on experiments.**
- **BASF partners with students from the National University of Singapore, Nanyang Polytechnic, Temasek Polytechnic and Republic Polytechnic to support communities in Singapore through science education.**

Singapore – September 9, 2026 – BASF Kids' Lab, an interactive, hands-on science education program, brought chemistry to life for around 200 children in Singapore on September 4 and 5, 2026, at Tampines Changkat Community Club. Reflecting BASF's commitment to supporting quality science education, this year's program expanded its reach to include children from Children's Wishing Well (CWW), a registered charity and Institution of a Public Character (IPC) supporting children and youths from disadvantaged backgrounds, as well as children from the Tampines Changkat community and beyond.

Under the theme "Clever Foodies," children ages 7 to 12 carried out safe, simple and interactive experiments to investigate the presence of vitamin C in beverages and discover the colorful world of food pigments. The activities gave participants a taste of life as young scientists while equipping them with knowledge and inspiration to make informed choices about their health and well-being.

BASF Kids' Lab 2026 was made possible through a strong community partnership involving BASF employees and student volunteers from the National University of

Singapore (Food Science and Technology Department), Nanyang Polytechnic, Temasek Polytechnic and Republic Polytechnic.

“Through BASF Kids’ Lab, we continue to engage local communities, spark curiosity from an early age and equip children with knowledge to make smarter choices for themselves, those around them and the environment. We are especially proud to bring together our employees, student volunteers and community partners to make this meaningful learning experience accessible to children across Singapore,” said Andy Postlethwaite, Managing Director, BASF South East Asia Pte Ltd, and Senior Vice President, Performance Materials, Asia Pacific.

About BASF in Singapore

BASF has been present in Singapore since 1978, supplying to customers from various industries, including chemicals, electronics, personal care, and health and nutrition. The company today operates three production facilities in Singapore, as well as Human Nutrition Application Lab Asia Pacific for its nutrition and health business. BASF posted sales to customers in Singapore of about €215 million in 2025 and had 499 employees as of the end of the year. Further information is available on www.basf.com/sq

About BASF

At BASF, we create chemistry for a sustainable future. Our ambition: We want to be the preferred chemical company to enable our customers’ green transformation. We combine economic success with environmental protection and social responsibility. Around 95,000 employees in the BASF Group contribute to the success of our customers in nearly all sectors and almost every country in the world. Our portfolio comprises, as core businesses, the segments Chemicals, Materials, Industrial Solutions, and Nutrition & Care; our standalone businesses are bundled in the segments Surface Technologies and Agricultural Solutions. BASF generated sales of around €60 billion in 2025. BASF shares are traded on the stock exchange in Frankfurt (BAS) and as American Depositary Receipts (BASFY) in the United States.
