BASF strengthens global feed enzyme analytical capabilities through strategic collaboration with VITA Laboratory

Bangkok, Thailand – September 8, 2026 – BASF continues to strengthen its strategic collaboration with VITA (Thai), a key analytical partner in feed enzyme testing, as part of its commitment to building a strong and reliable technical support network for customers worldwide. As part of this collaboration, BASF has handed over an SVM 3001 Viscometer to further enhance VITA Laboratory's analytical capabilities and support accurate, reliable and efficient feed enzyme analysis.

The new instrument will strengthen capabilities in enzyme-related testing, particularly for xylanase, as well as application-focused evaluations under commercial feed production conditions. By expanding analytical capacity and technical expertise, BASF and VITA Laboratory aim to provide consistent and high-quality support to customers across ASEAN, and the other key markets globally.

This investment represents more than the installation of a new analytical instrument. It reflects the shared commitment of BASF and VITA Laboratory to advancing analytical excellence, strengthening global technical capabilities and supporting continued innovation in animal nutrition. By combining BASF's expertise in feed enzymes with VITA Laboratory's analytical capabilities, the partnership helps build a stronger technical foundation to support customers and contribute to the sustainable growth of the feed industry worldwide.

About BASF

At BASF, we create chemistry for a sustainable future. Our ambition: We want to be the preferred chemical company to enable our customers' green transformation. We combine economic success with environmental protection and social responsibility. Around 95,000 employees in the BASF Group contribute to the success of our customers in nearly all sectors and almost every country in the world. Our portfolio comprises, as core businesses, the segments Chemicals, Materials, Industrial Solutions, and Nutrition & Care; our standalone businesses are bundled in the segments Surface Technologies and Agricultural Solutions. BASF generated sales of €60 billion in 2025. BASF shares are traded on the stock exchange in Frankfurt (BAS) and as American Depositary Receipts (BASFY) in the United States.
