## **BASF increases production capacity for aminic antioxidants**

- **Investment addresses increasing global demand for long-life lubricants**
- **Capacity expansion project for aminic antioxidants at BASF's Puebla site to be completed in 2026**

FLORHAM PARK, NJ, March 20, 2025 – BASF is investing in its manufacturing site in Puebla, Mexico, to increase the capacity of aminic antioxidants for lubricants. This expansion underscores BASF's commitment as a dedicated supplier of components for the lubricant industry, addressing the growing demand for antioxidant additives, driven by increasing stability requirements in lubricating oils and the growing number of vehicles on the road.

"We are dedicated to understanding and addressing the evolving needs of our customers, both regionally and globally, by enhancing the reliability of our production and delivery processes," said Marius Vaarkamp, Business Director Components North America, Fuel & Lubricant Solutions, BASF. "Our investment in the production of aminic antioxidants for lubricants reflects our commitment to providing solutions that align with market demands."

### **About BASF's Fuel and Lubricant Solutions business**

With innovative products, industry-leading technical expertise and a global presence, we serve customers of various industries globally, close to their markets. Our portfolio comprises innovative
