BASF introduces Ridivex herbicide, a new all-in-one standard for post-emerge weed control in corn

RESEARCH TRIANGLE PARK, NC, March 5, 2026 – BASF is introducing Ridivex™ herbicide, a convenient all-in-one premix of three active ingredients with three different sites of action. Ridivex herbicide delivers powerful knockdown and long-lasting residual control, which will give corn growers confidence that their weed management is complete for today, tomorrow and weeks to come. Ridivex herbicide is currently pending registration with the U.S. Environmental Protection Agency (EPA).

“Ridivex herbicide will equip corn growers doing the [biggest job on Earth](#) a new all-in-one early-post tool engineered to stay ahead of weed emergence and maintain clean fields through critical growth stages,” said Jessica Dorsey, Product Manager for Corn POST Herbicides, BASF Agricultural Solutions. “This triple-mode of action formulation is designed to help growers stay ahead of resistant weeds and protect yield potential without compromising on performance.”

A new standard in corn post-emerge herbicides, Ridivex herbicide provides:

- **Powerful knockdown:** Consistent control of 200+ broadleaf weeds, enhanced dicamba transportation and performance from diflufenzopyr, and visible results in as little as four hours.

- **Long-lasting residual:** Superior residual control of 80+ broadleaf and grass weeds for up to eight weeks, from the trusted Zidua® SC herbicide leader and partner in residual herbicides.
- **Convenient and complete:** Triple threat against weeds with three effective active ingredients – diflufenzopyr, dicamba and pyroxasulfone. A built-in crop safener enhances crop safety for peace of mind.

Corn growers today are facing unprecedented weed pressure as resistant species continue to spread and intensify. Managing these tough-to-control populations often requires more passes, more products, and more time – adding cost and complexity to an already demanding time of year. Resistant weeds not only threaten yield potential but also erode the effectiveness of single-mode of action herbicides. Ridivex herbicide directly answers this need: its triple-mode of action formulation is purpose-built to help growers stay ahead of resistant weeds and protect yield potential without compromise. About BASF's Agricultural Solutions division

Everything we do, we do for the love of farming. Farming is fundamental to provide sufficient and affordable food for a rapidly growing population, while reducing environmental impacts. That's why we are working with partners and experts to integrate sustainability criteria into all business decisions. With €990 million in 2025, we invest in a strong R&D pipeline, and our solutions are purpose-designed for different crop systems. Connecting seeds and traits, crop protection products, digital tools and sustainability approaches, to help deliver the best possible outcomes for farmers, growers and stakeholders along the value chain. In 2025, our business generated sales of €9.6 billion. For more information, please agriculture.basf.us or our social media channels.

About BASF

BASF Corporation, headquartered in Florham Park, New Jersey, is the North American affiliate of BASF SE, Ludwigshafen, Germany. BASF has more than 15,600 employees in North America and had sales of \$18.1 billion in 2025. For more information about BASF's North American operations, visit www.basf.com/us.

At BASF, we create chemistry for a sustainable future. Our ambition: We want to be the preferred chemical company to enable our customers' green transformation. We combine economic success with environmental protection and social responsibility. Around 108,000 employees in the BASF Group contribute to the success of our customers in nearly all sectors and almost every country in the world. Our portfolio comprises, as core businesses, the segments Chemicals, Materials, Industrial Solutions, and Nutrition & Care; our standalone businesses are bundled in the segments Surface Technologies and Agricultural Solutions. BASF generated sales of around €60 billion in 2025. BASF shares are traded on the stock exchange in Frankfurt (BAS) and as American Depositary Receipts (BASFY) in the United States.
