

Zig -Zagging with Elastopave

Project:

Private Villa

Location:

Fujairah

Project Completion:

Complete

Client:

UAE

Applicator:

Horizon 7

Sector/Surface:

Villa, existing concrete base

Product Function:

Porosity and Aesthetics

Products Used:

Elastopave® System -

Elastan® 6568/120/S Aliphatic

Elastan® 6568/119 Aromatic

Background

The client requested a simple but effective design to suit the surroundings. The idea that the system was porous and easy to maintain was a key factor to having it installed.

Challenges

As the villa was so close to the coastline, the timing and protection during the application was key to the successful outcome. The design was provided by the client and had to be set out with accuracy to ensure all the lines were perfectly straight.

Solutions

BASF's Elastopave® polyurethane system the most suitable for any applications where crushed stone or gravel needs firm bonding was proposed for this project.

Customer Benefits

The Elastopave system was suited to this application, due to the viscosity of the system. The system is easy to maintain and the look is fantastic.

Project facts at a glance

- BASF provided comprehensive technical advice and economical solutions to achieve the required performance.
- Excellent support and guidance from BASF's Technical Services team, including on-site training and periodic quality assessments to ensure application was being carried out correctly.
