

We are thrilled to announce the launch of the BASF UK Innovation Collaboration Day to help foster partnerships with innovators and the local start-up community working for a sustainable future. This is an opportunity for start-up enterprises and early-stage companies to present their innovative technologies to a BASF expert panel. We are seeking 100 start-up enterprises and early-stage companies with innovative technologies in the areas of carbon capture and utilization, green energy solutions, agro innovation, circular economy, and other emerging sectors such as robotics, nuclear energy, genomics, green biotechnology, CRISPR technology, and plant-based chemistry.

Interested companies are invited to apply by 13 August 2023 through an online form [available here](#). To support this process, this document contains the questions you'll be submitting using the online form. Please, feel free to **use it as a draft version before submitting the final application**. Please note that only the applications submitted using the link above will be accepted.

-
- Name of the company

- Location

- Are you applying as an individual or a start-up enterprise?

- *If question 3 answer is "individual":*

- If individual, name of the individual applying and role within the company

- *If question 3 answer is "start-up enterprise":*

- Annual Turnover (GBP)

- Number of employees

- E-mail address

- Phone number

- Which cluster group does your solution/business fall under?

Carbon Capture and Utilisation: We're seeking start-ups with cutting-edge carbon capture and utilisation technologies that aim to reduce greenhouse gas emissions, transform CO2 into valuable products, and contribute to a cleaner, and more sustainable future.

Green Energy Solutions: We're searching for start-ups focused on innovative renewable energy solutions, including advancements in solar, wind, and other clean energy sources. These solutions should promote energy efficiency, reduce environmental impact, and accelerate the transition to a sustainable energy future.

Agro Innovation: We're looking for start-ups that revolutionise agriculture through precision farming, alternative proteins, biodiversity preservation, and other disruptive solutions. Innovations like these should increase crop yields, promote sustainable food production, and protect the planet's natural resources.

Circular Economy: We're interested in start-ups that develop innovative solutions like renewable carbon, and plastics and battery recycling, supporting waste reduction, resource recovery, and a circular economy approach. Innovations can include renewable feedstocks and raw materials. These solutions should minimise environmental impact and promote a more sustainable and eco-friendly future.

Wildcard: We recognize the exciting new opportunities emerging in the UK across a variety of emerging sectors, especially in the last 3 years. We are keen to hear from start-ups and early-stage companies operating in the fields of robotics, nuclear energy, genomics, green biotechnology, CRISPR Technology, and plant-based chemistry.

- Name of the solution

- Short description of the solution and type (Licensing, Technology, Manufacturing, SaaS etc.) [500 words]

- Goal of the solution (Explain what you aim to achieve with your solution) [500 words]

- How will your solution help achieve the goal? [500 words]

- What are the application possibilities of your solution ? (Explain how your idea could be applied) [500 words]

- If your solution has been tested, what is the performance? (Explain any real-life results obtained/targets achieved or if the solution has NOT been tested, explain your hypothesis) [500 words]

- How is your solution different to existing ideas? [500 words]

- If successful, what support do you require from BASF?

- If you have any material (links, project presentations etc.) supporting your application, please add the links below (e.g.: websites, wetransfer, etc.)

- Data protection

By registering for this event, you will receive email communications from BASF plc, a company registered in England and Wales, with registered number 00667980 about this series of events. Your details will be stored in BASF plc's contacts database for the purpose of sending you legal updates, newsletters, event invitations and other information which we think is relevant to you.. To find out more about how we store, and process personal data view our privacy policy: <https://www.basf.com/gb/en/legal/data-protection-at-basf.html>

We may supply your personal data to other BASF Group companies, affiliates or a limited number of suppliers of BASF (which may be situated outside the European Economic Area ("EEA")) so that we or they may contact you with information about products and events offered by us or them. It is our policy not to pass any of your personal data to third parties outside of the BASF Group or use your personal data for any purposes other than those indicated above or as stated in our privacy policy.

You have the right to access, rectify or request us to erase your details from our database. You also have the right to lodge a complaint with a supervisory authority or object to our processing of your data. You can do this by emailing us at data-protection.uk@basf.com

I have read the relevant information on data protection and I would like to register for the event.
