

Senior Technology Manager Ethylene Oxide / Ethylene Glycol for our projects in China (m/f/d)

The Petrochemicals division is the starting point for BASF's petrochemical-based value chains globally. With six Verbund sites and several major production sites, we are present in the largest chemical markets worldwide. We supply various value chains across the company and a broad range of external customer industries with high-quality chemicals that are used in PET bottles, antifreezing agents, hygiene products and insulating materials to name only a few examples.

RESPONSIBILITIES

The Petrochemicals division CP is the "Heart of the Verbund". It produces and markets a broad portfolio of Petrochemicals. The chemicals are used among others in PET bottles, antifreezing agents, coatings, superabsorbent polymers, carbonated drinks or cling films to name only a few examples.

For our planned large-scale project BASF is looking for a project team which will plan our new facilities for BASF in Asia. The conceptualization phase will take place in Ludwigshafen. After that you will have the opportunity to continue the detailed planning and realization in South China. Our objective is our mission "Excellence in Petrochemicals!"

For more details see www.basf.com/megaprojects-asia

- o When planning our new plants for BASF in Asia, you will pass on the process engineering know-how and be the contact person for the engineering, taking safety aspects, product specifications and manufacturing technologies into account.
- o In addition, you are responsible for risk control measures and promote cost-cutting initiatives based on the product portfolio and problems.
- o You take care of the security of design, process and operational aspects.
- o Furthermore, you take care of all technical matters relating to the process from pre-feed to execution, for example preparation and participation, security discussions and model review.
- o You are part of our project team and will be delegated to China at a later date to plan and implement the project in detail.

BENEFITS

- o Development discussions and programs so that you can reach your full potential.
- o International assignments where you will build networks and experience different cultures.
- o An attractive competitive salary that is based on the company's success and your individual performance.
