

1. General

1.1 These conditions of purchase of BASF SE and its Affiliated Companies Located in Germany for Engineering Services (hereinafter "Conditions of Purchase for Engineering Services") form an integral part of the contracts on provision of engineering and architectural services, such as calculations, planning services and technical consulting services (hereinafter collectively "Engineering Services") between the service provider, respectively, (hereinafter "Contractor") and BASF SE or its affiliated companies located in Germany, respectively, (hereinafter "Principal"), insofar and to the extent not agreed otherwise in the individual Contract.

1.2 General terms of business of the Contractor shall only apply if and insofar as the Principal has explicitly accepted them in writing. Any references of the Principal to correspondence from the Contractor containing or referring to the Contractor's general terms of business shall not constitute the Principal's acceptance of the applicability to this Contract of such general terms of business.

The Contractor's general terms of business shall also not apply if the Principal should accept the provision of Engineering Services in the knowledge that the Contractor has purported to deliver them on general terms of business of the Contractor that deviate from or are in conflict with these Conditions of Purchase for Engineering Services.

2. Offer

2.1 Offers and price quotes shall not be remunerated and shall not create any obligations on the part of the Principal.

2.2 In its offer the Contractor shall explicitly expose any discrepancies between its offer and the Principal's inquiry.

3. Types of Orders

3.1 "Contract" in the meaning of these Conditions of Purchase for Engineering Services is an object-related or project-related individual Contract and a "call-off contract" based on an existing framework purchase order or framework contract (hereinafter "Framework Order") between the Principal and the Contractor.

3.2 For the call-off contract, the provisions in the relevant framework purchase order shall apply even if the Principal does not refer to the relevant framework purchase order when concluding or awarding the respective call-off contract.

3.3 Details on the type of order are specified in the Principal's relevant purchase orders.

Type and scope of the Engineering Services to be provided, and the remuneration of the Contractor are defined by the Contract and its following components – valid in case of contradictions in the specified sequence. This order of precedence does not apply if any ambiguity or incompleteness in the primary contract elements can be remedied or completed by the subordinated contract elements. Applicable are:

- a) The respective Contract
- b) Framework purchase order (in case of a call-off contract)
- c) The Principal's "Supplementary discipline-specific provisions for Engineering Services" specified in the respective Contract or framework purchase order in the version valid at the time of contract conclusion
- d) The "Conditions of Purchase of BASF SE and its Affiliated Companies Located in Germany for Engineering Services" in the version valid at the time of contract conclusion
- e) Standard Service Catalogs (SSC) / Service Catalogs (SC)
- f) The site regulation of the Principal valid at the place of provision of the Engineering Services in the version valid at the time of contract conclusion can be downloaded at <http://www.basf.com/supplier-conditions>
- g) The other discipline-specific Technical Rules of the Principal specified in the respective Contract or framework purchase order in the version valid at the time of contract conclusion

- h) All technical regulations and standards in the respective version valid until acceptance, such as DIN standards, EN standards, ISO standards, VDI/VDE directives including published drafts, provided that they comply with the generally applicable rules of technology, the manufacturer's guidelines and regulations, provided that they comply with the generally applicable rules of technology valid at the time of acceptance
- i) The relevant regulations on occupational health and safety such as the Construction Site Ordinance and the provisions on occupational health and safety at construction sites, the Occupational Health and Safety Act, the German Workplace Ordinance and the Workplace Regulations, DGUV regulations (accident prevention regulations), other provisions issued by professional associations, the directives and regulations issued by German property insurers
- j) Public laws, ordinances and other regulations issued by the federal government, the states and other public law bodies. The Contractor shall ensure that its employees, any personnel service providers and subcontractors (hereinafter "Vicarious Agents") have access to and are familiar with the aforementioned site regulations specified in f). The Contractor shall also ensure that its Vicarious Agents comply with the site regulations.

4. Dates / Periods, Partial Services, Changes

4.1 The Contractor shall comply with all contractually agreed dates. Meeting the deadlines agreed in the Contract is an essential contractual duty. The time of final acceptance is definitive for the timeliness of the completion of the Engineering Services.

4.2 Advance completion of Engineering Services or the provision of not contractually agreed partial services require prior approval by the Principal. As soon as the Contractor recognizes that it is not able to fulfill its contractual obligations either in full or in part, or not within the time frame given, it must report this to the Principal in writing without hesitation, stating the reason(s) for this delay and the predicted length of the delay, and propose measures for avoiding missing the deadline.

Unconditional acceptance of a delayed (partial) Engineering Services shall by no means waive any rights or claims of the Principal related to the late (partial) Engineering Services.

On becoming aware of an increase, reduction, change or other deviation (hereinafter "Changes") from the agreed scope of services to be performed while fulfilling the Contract, the Contractor shall inform the Principal immediately in writing specifying the resulting scheduling and financial consequences. Any Changes to the Engineering Services require prior written consent by the Principal.

If the Principal exercises its rights to unilaterally demand Changes to the Contract, the Contractor is obligated to comply if the execution is reasonable.

Any adaptation of the remuneration in such a case is governed, by way of analogy, by statutory provisions in § 650c BGB.

4.3 The Contractor shall request the documents required for the provision of the Engineering Services from the Principal in due time and review the documents for completeness and compliance immediately upon receipt. The Contractor shall inform the Principal immediately in writing of any inconsistencies that are apparent to the Contractor.

4.4 If any part of the Engineering Services shall be performed at the site of the Principal, such Engineering Services shall be performed within the normal working hours of the Principal. Regular working hours are weekdays from Monday to Friday, 7:30 a.m. to 4:30 p.m., unless otherwise agreed in the Contract. A contact designated by the Contractor must be available to the Principal at all times during normal working hours.

4.5 The Vicarious Agents deployed by the Contractor have to possess the required skills, qualifications (in particular specialized knowledge) and experience to provide the commissioned Engineering Services in compliance with the Contract and are

equipped with the necessary equipment and the personal protection equipment specified.

5. Sustainability, EHS and Safety Regulations

5.1 The Principal conducts its business in accordance with the principle of sustainable development and adheres to internationally recognized fundamental standards for occupational health and safety, environmental protection, labor and human rights as well as responsible corporate governance (hereinafter "ESG Standards"). The Principal has described its understanding of the ESG Standards in the Supplier Code of Conduct (<http://www.basf.com/supplier-code-of-conduct>). The Principal expects the Contractor to adhere to the ESG Standards. Furthermore, the Principal calls upon the Contractor to ensure that all its subcontractors of any tier adhere to the ESG Standards likewise. The Principal shall have the right to check adherence to the ESG Standards on the part of the Contractor, either itself or through third parties that it commissions, with prior notice.

5.2 The Contractor shall take all necessary precautions and safety measures in order to prevent within its scope of responsibility damage to persons, health, the environment, property and assets at its own cost.

5.3 The Contractor shall ensure that the Vicarious Agents it uses comply with the constraints of the Principal regarding occupational safety and health and environmental protection (EHS) specified in the Contract, all relevant statutory, governmental and other EHS regulations and the plant-specific safety instructions that are to be provided to the Contractor by the responsible plant management of the Principal before the start of the Engineering Services.

5.4 The Contractor is responsible for giving instructions to and supervising its Vicarious Agents. In the case of imminent danger, the Principal may give safety-related instructions to the Vicarious Agents of the Contractor.

5.5 The Contractor shall furnish its Vicarious Agents with personal safety equipment as required for the Engineering Services being provided.

5.6 The Contractor shall bear any processing costs incurred by the Principal as the result of culpable wrongdoing on the part of the Contractor and his Vicarious Agents, especially in the case of violations of criminal law or the Technical Rules named in Clauses 3.3 and 5.3. The Principal's further rights shall remain unaffected.

6. Quality

The Contractor shall carry out and maintain effective quality assurance and, if requested, demonstrate this to the Principal. The Contractor shall apply a quality assurance system with elements as per ISO 9000 ff. or a similar system of equivalent standard. The Principal shall have the right to inspect the Contractor's quality assurance system with prior notice, either itself or through third parties commissioned by the Principal.

7. Testing and Inspection in the Course of Contract Fulfillment

7.1 The Principal has the right to test or inspect how the Contract is being fulfilled by the Contractor.

7.2 Such inspection/testing does not have any effect on the contractual and legal rights or claims of the Principal.

8. Acceptance of Engineering Services

8.1 As soon as the Contractor has provided the Engineering Services in full in accordance with the Contract, the Contractor shall inform the Principal of the completion of the Engineering Services in writing (including the use of an Electronic Data Processing (EDP) system such as Avisor). The Contractor is obligated to review its Engineering Services prior to the notification of completion for completeness and faultlessness and promptly execute any remaining work/rework that may be necessary. If the

Conditions of Purchase of BASF SE and its Affiliated Companies Located in Germany for Engineering Services

requirements for acceptance have been met, the acceptance will be given in writing. Section 640 Para. 2 BGB remains unaffected. Engineering Services provided under call-off contracts can be accepted in the Avisor EDP system, which the Contractor can use. The above provisions apply accordingly in the case of contractually agreed partial acceptance.

The Principal can refuse to submit a declaration of acceptance and withhold any installment payment associated with this if the Engineering Services are not provided in full or are defective; however, acceptance cannot be refused due to insignificant defects. Sentence 1 also applies in the case of an agreed acceptance date or a deadline for acceptance set for the Principal by the Contractor.

8.2 Clauses 8.1 to 8.3 apply equally to the acceptance of a rectification measure in the case of a liability for defects on the part of the Contractor.

8.3 The Contractor shall issue a partial and final invoice, which must meet the requirements of Clause 15, for accepted partial and complete service.

9. Use of subcontractors and personnel service providers

9.1 Third parties (in particular any subcontractors as well as personnel service providers and self-employed persons or leasing employees provided by the Contractor) may only be employed or replaced to perform the contract by the Contractor with the Principal's prior written consent. The Principal will not refuse its consent without cause. If the Contractor intends to use subcontractors to fulfill the Contract from the outset, the Contractor must inform the Principal of this when submitting its offer.

9.2 The Principal has the right to base its decision whether to grant approval for the use or replacement of subcontractors and personnel service providers by the Contractor within the meaning of Clause 9.1 on an approval audit. Upon request by the Contractor, the Contractor may participate in such an approval audit.

9.3 Irrespective of the execution of an approval audit and the written consent of the Principal, the Contractor shall contractually obligate the designated subcontractors or personnel service providers to refrain from deploying third parties within the meaning of Clause 9.1 without prior written consent. The Contractor shall undertake all reasonable checks and efforts to prevent an impermissible personnel leasing or a chain leasing within the meaning of § 1 para. 1 sentence 3 of the German Temporary Employment Act (AÜG).

9.4 The use of third parties or a respective consent from the Principal shall not affect the Contractor's responsibility for proper fulfillment of the Contract.

9.5 The Contractor shall ensure that its contracts concluded with subcontractors include a clause that, in the event of early termination of this Contract for reasons attributable to the Contractor, the Principal may enter the contract concluded between the Contractor and the subcontractor.

10. Statutory Minimum Wages Act (MiLoG), Employee Assignment Law (AEntG), Prohibition on Illegal Employment

10.1 The Contractor must ensure that the employees used by the Contractor or its subcontractors or personnel service providers to perform contracts with the Principal receive the minimum wage as per the German Minimum Wages Act (MiLoG), respectively the minimum hourly rate of pay (Mindeststundenentgelt) according to the regulation based on § 3a of the German Temporary Employment Act (Arbeitnehmerüberlassungsgesetz) or, if the Engineering Services to be provided are subject to the scope of the Employee Assignment Law (AEntG), the respectively required industry minimum wage. The Contractor must also ensure that binding obligations to pay contributions to social security carriers, employers' liability insurance associations and other institutions such as the joint institutions of the collective bargaining agreement parties named in § 8 AEntG are fulfilled.

10.2 When choosing subcontractors or personnel service providers, the Contractor shall check fulfillment of the aforementioned conditions as per Clause 10.1 and require them to provide written confirmation of compliance. Furthermore, the Contractor shall obtain written assurance from these parties that they will require other subcontractors or personnel service providers as may be engaged to comply with the requirements.

10.3 The Contractor shall indemnify the Principal against justified claims any employee of the Contractor or any employee of a subcontractor, regardless of level, or of a personnel service provider used has brought forward towards the Principal as the guarantor of payment of the statutory minimum wage or industry minimum wage, or claims by one of the institutions of the collective bargaining agreement parties named in § 8 AEntG for the provision of payments.

10.4 The Principal is entitled to terminate the Contract with the Contractor without notice if and when the Principal is justifiably made liable as guarantor according to MiLoG or AEntG.

10.5 Moreover, the Contractor shall accept liability vis-à-vis the Principal for any damage that may be suffered by the Principal through culpable failure to meet the obligations as per Clauses 10.1 and 10.2.

10.6 Illegal employment of all kinds is prohibited.

11. Condition of the Engineering Services, Rights in the Event of Defects

11.1 The Contractor's statutory liability for defects shall be as set forth in the statutory provisions of the German Civil Code (BGB). The Contractor is responsible for provision of Engineering Services free of defects while cooperating in compliance with the Contract for work and services, in particular complying with the agreed specification of services, ensuring the Engineering Services are suitable to be used, as agreed with the Principal or presupposed under the Contract, for the building/engineering construction and/or plant, and, additionally, for ensuring that guaranteed properties and features are present.

11.2 In addition, the Contractor guarantees that the Engineering Services meet the current technical standards and – if applicable – the generally recognized standards in plant safety, occupational medicine and hygiene; are provided by qualified Vicarious Agents and are in line with all relevant legal regulations pertinent at the place of fulfillment.

11.3 In the case of project or object supervision delegated to the Contractor, the Engineering Services shall be considered defective if the building/engineering construction and/or plant has not been erected in line with the contract and this is attributable to a defective or neglected supervision and/or coordination service on the part of the Contractor.

11.4 The limitation period for defects in Engineering Services provided under a Contract for work and services is based on Section 634a German Civil Code (BGB) and begins with the Principal's acceptance. A waiving of claims for defects on behalf of the Principal shall only come into effect if expressly presented in writing.

11.5 In the event of any defects in the Engineering Services, the Principal has the right to demand rectification of such defects according to applicable law.

The Contractor shall bear the cost of rectification within the framework of the statutory provisions and must execute rectification in all respects in accordance with the Principal's instructions and requirements. If rectification does not take place within an appropriate period of time, rectification has failed, or it is not necessary to fix a grace period for rectification, the Principal shall be entitled to claim further legal rights in the event of defects.

11.6 If rectification does not take place within an appropriate period of time, if it has failed, if the Contractor is in delay with regard to rectification, or if it is not necessary to fix a grace period for rectification, the Principal has the right, in addition to the rights named in Clause 11.5, to remedy the defects itself at the cost

Conditions of Purchase of BASF SE and its Affiliated Companies Located in Germany for Engineering Services

and liability of the Contractor, or allow this work to be undertaken by third parties. The Principal is in this case entitled to demand compensation from the Contractor for the required measures. A grace period for rectification is particularly unnecessary if there is a danger of unreasonably high damages and the Contractor cannot be reached. In addition, the applicable law shall apply. Any additional rights of the Principal concerning the Contractor's statutory liability for defects or under any guarantees shall remain unaffected.

12. Infringing Property Rights

It is the Contractor's responsibility to ensure that the Engineering Services of the Contractor and the use thereof pursuant to the Contract will not infringe any patent laws, copyright or other proprietary rights of third parties. Notwithstanding other legal claims, the Contractor shall indemnify the Principal from any third party claims for which the Principal may be held liable as a result of the infringement of any of the aforementioned property rights if these are based on a culpable violation of obligations by the Contractor. The Contractor shall in this case bear the cost of any licensing fees, expenses and fees incurred by the Principal in preventing and/or rectifying any infringements of property rights.

13. Contract Penalty

If a contract penalty has been agreed upon and is incurred, the Principal is entitled to claim such penalty until the final payment is due without requiring a reservation pursuant to section 341 paragraph 3 of the German Civil Code ("BGB").

14. General Liability, Insurance

14.1 Unless otherwise established in these Conditions of Purchase for Engineering Services, the Contractor shall be liable as per the statutory provisions. If claims are made against the Principal by third parties due to damage that falls under the responsibility of the Contractor, the Contractor undertakes to indemnify the Principal from these claims immediately, unless the Contractor proves that it has not culpably caused the damage in question.

14.2 The Contractor shall take out and maintain sufficient liability insurance, that also covers damage sustained by industrial customers, in line with usual industry standards at its own cost for damage for which the Contractor may be held liable.

14.3 The coverage of liability insurance per damage event must be at least EUR 5,000,000 all-inclusive for damage to persons, property and assets and a maximum annual compensation payment of at least EUR 10,000,000. Evidence of the amount of insurance coverage shall be provided to the Principal upon request.

14.4 The Contractor's contractual and legal liability remains unaffected by the extent and amount of his/her insurance coverage.

15. Price Types, Remuneration, Invoicing, Payment

15.1 The remuneration for Engineering Services accepted by the Principal is paid in accordance with the price types

- "lump-sum fixed price"
- "fixed price", or
- "price by expenditure"

In the case of the "fixed price" price type, Engineering Services accepted by the Principal are billed and settled based on the contractually agreed Service Catalogs (SC) / Standard Service Catalogs (SSC). In the case of the "price by expenditure" price type, Engineering Services accepted by the Principal are billed and settled based on the agreed hourly rates, provided hourly billing and settlement is permitted by law. Different price types may be defined in the Contract.

15.2 The agreed remuneration is net price, if the Engineering Services are taxable and subject to taxation in Germany, any value-added tax owed by law shall be included in the invoice and paid when the invoice is settled; the invoice shall comply with the

requirements of German Value Added Tax Act (UStG), including Section 14 of the German Value Added Tax Act (UStG), where appropriate. Otherwise, the Principal can withhold any value-added tax until the Contractor has submitted a corresponding invoice which entitles the Principal to an input tax deduction. If self-billing under Section 14 Para. 2 Sentence 2 of UStG is agreed, the Contractor must transfer to the Principal all data required as per the applicable value-added tax legislation specified in advance. If the Contractor is not based in Germany, while the Engineering Services are taxable and subject to taxation in Germany, the invoice shall explicitly specify "Tax liability of the recipient of the services" or "Reverse Charge" (Section 13b Para. 5 UStG). Specifying value-added tax in these invoices is not permitted.

15.3 The Contractor shall state the full purchase order number of the Principal on the invoice.

Proof of services and other supporting documents shall be included with the invoice. Invoices shall correspond to the Contract with regard to designation, price, quantity, sequence of ordered items and item numbers. Invoices are to be sent to the billing address specified in the Contract.

15.4 Unless otherwise agreed, the payment period shall commence as soon as an invoice that meets the aforementioned requirements, has been received at the billing address. In the case of self-billing, the payment period commences the day the credit memo is issued. Payment will be made subject to verification that the Engineering Services conform to the Contract and are complete.

15.5 Payments by the Principal shall not represent an acceptance of the conditions or prices stated in the invoice, and shall not constitute a waiver of the Principal's rights regarding Engineering Services performed that differed from those as agreed upon, the Principal's rights to inspection, or the right to find fault with an invoice for other reasons.

15.6 If a tax deduction is required by legal provisions affecting the Contractor for a service provided by the Principal, then the Principal is liable for the due tax. The withholding of the tax is settled by a deduction from the respective invoice amount. A certificate shall be prepared for the withheld tax upon demand by the Principal and to the extent it is required by law in accordance with the legally required sample. Reference is made to the relevant provisions of the German Income Tax Act, in particular §§ 49 et seq.

16. Assignment of Contract, Transfer, Change of Company Name, Offsetting, Retention

16.1 The Contractor may assign his/her rights and obligations under the Contract with the Principal to third parties only with the prior written consent of the Principal.

16.2 The Contractor is required to notify the Principal forthwith in writing of any assignment of the Contract by virtue of law and of any change of its trade name.

16.3 The Principal may assign the rights and obligations under the Contract with the Contractor to BASF SE, Ludwigshafen (Rhine) or to any affiliated company pursuant to section 15 of the German Stock Corporation Act at any time without the Contractor's prior agreement, provided that the execution of the Contract is not endangered thereby.

16.4 The Contractor is only permitted to offset reciprocal claims arising from this contractual relationship, and against undisputed claims or claims substantiated by court judgement. The Contractor is only entitled to a right of retention if the claim, due to which the right of retention shall be deemed valid, has its origins in the same contractual relationship.

17. Termination, Rescission

17.1 The Principal's right to ordinary termination of the Contract with notice or to rescission from the Contract shall follow statutory provisions, unless set forth otherwise in the individual Contract.

Conditions of Purchase of BASF SE and its Affiliated Companies Located in Germany for Engineering Services

17.2 Each contracting party is entitled to terminate the agreement for good cause, provided the respective statutory requirements for this are met, such as for continuing obligations as per § 314 BGB or services within the scope of work contracts as per § 648a BGB. A good cause for termination by the Principal is given in particular if:

- The Contractor commits a breach of duty, which is not remedied within a reasonable period of time defined by the Principal and following a termination warning or a fruitless warning, and therefore, taking into account all circumstances of the individual case and weighing the mutual interests, the continuation of the contractual relationship cannot reasonably be expected from the terminating party, or

- The relationship of trust is significantly and lastingly disrupted due to circumstances occurring after conclusion of the Contract, e.g. due to a violation of criminal laws committed in connection with the performance of the Contract or due to commission of administrative offenses in the course of the performance of the Contract by the Contractor or by third parties employed by the Contractor for the execution of the Contract, and therefore, taking into account all circumstances of the individual case and weighing the mutual interests, the continuation of the contractual relationship cannot reasonably be expected from the terminating party, or

- A significant deterioration in the asset situation of the Contractor has taken place, which jeopardizes contract fulfillment, or

- The Contractor does not comply with his/her obligation to pay taxes or social security contributions, or

- The Principal has a special termination right under Section 650r of the German Civil Code (BGB), or

- There are other circumstances that make continuation of the Contract with the Contractor unreasonable for the Principal.

17.3 Further rights legally provided to the Principal regarding termination, termination for good cause and rescission from the Contract shall remain unaffected by this provision.

Payments already made by the Principal shall be refunded in cases of overpayment. The Principal's further statutory rights and claims, in particular with regard to damage compensation, shall remain unaffected.

17.4 Any termination must be in written form.

17.5 If the Contractor has acquired from the Principal any documents, records, plans or drawings from within the scope of the contractual collaboration and/or while fulfilling the Contract the Contractor must forthwith hand them over to the Principal in the event of termination. These requirements apply likewise in the event of rescission.

18. Rentals on the Works Site by the Principal

The Contractor has no right to use the infrastructure at the Principal's site unless otherwise agreed in the Contract.

19. IT

19.1 IT hardware and software for standard PC applications shall be provided by the Contractor. Exceptions to this shall be agreed with the Principal.

19.2 The Contractor shall notify the Principal early on if the provision of the service requires the use of IT hardware and software products in use at the Principal's site (e.g. the use of BASF-specific network applications). In those cases, the IT hardware and software products shall be provided on the basis of separate contractual agreements, which may include rental agreements. Absent an agreement to the contrary, the Contractor will only have the right to use the IT hardware and software products for the purpose of providing the service it contractually owes and only for as long as it provides that service.

20. Documents, Confidentiality, Rights of Use, Data Protection

20.1 The Contractor must provide to the Principal the agreed quantity of plans, calculations or other documents in order not to exceed the contractual deadline for execution.

20.2 The review and/or release of any Contractor's documents by the Principal shall not relieve the Contractor of any of its responsibilities for these documents under the Contract.

20.3 Any models, samples, drawings, data, materials and other documents provided to the Contractor by the Principal (hereinafter "Principal Documentation") shall remain the property of the Principal and must be returned to the Principal forthwith upon its request at any point in time. The Contractor shall have no rights to retain any Principal Documentation. The Contractor must observe the proprietary rights of the Principal in and to all Principal Documentation.

20.4 The Contractor is obliged to keep confidential all technical, scientific, commercial and other information obtained either directly or indirectly within the scope of the Contract, in particular the information given in Principal Documentation (hereinafter "Confidential Information"). The Contractor may not exploit Confidential Information for commercial purposes, make it the object of industrial property rights, pass it on or make it accessible to third parties in any way. The Contractor is entitled to share confidential information with subcontractors approved by the Principal if the subcontractor requires this information in order to fulfill the Contract.

Confidential Information may not be used for any purpose other than fulfilling the Contract. The aforementioned confidentiality obligation shall continue to apply for a period of ten (10) years after the Contract has ended.

20.5 This confidentiality requirement shall not include any information that the Contractor lawfully possessed prior to the Principal's disclosure of such information, or is lawfully known to the public, or has been lawfully obtained from a third party. Also excluded from this confidentiality requirement shall be information that is disclosed to persons subject to a legal obligation to confidentiality, whereas the Contractor shall not release such a person from its obligation to confidentiality. The burden of proof for such an exception lies with the Contractor.

20.6 The Contractor shall ensure that its employees and other Vicarious Agents deployed to fulfill the Contract are obliged to confidentiality according to the above confidentiality provisions by means of appropriate contractual agreements, too. Upon request, the Contractor shall confirm compliance with these obligations to the Principal in writing.

20.7 The Contractor shall specifically undertake all required, appropriate precautions and measures to effectively protect the Confidential Information obtained at all times against loss or against unauthorized access. This includes in particular the creation and maintenance of appropriate, required access and entry precautions for facilities, repositories, IT systems, data storage devices and other information storage devices, especially those which contain Confidential Information. This also includes informing and instructing those people who are granted access to Confidential Information pursuant to this clause. The Contractor is required to promptly notify the Principal in writing in the event that Confidential Information is lost and/or accessed by unauthorized parties.

20.8 "Work Results" are the results of the Contractor's work that arise in connection with the order as well as the results of the work of third parties that have been brought in by the Contractor to perform the Contract with regard to the production of work results as well as all of the Contractor's copyright-protected items and services that may arise in the course of Contract performance, including, without limitation, all plans, drawings, graphics, calculations and other documents.

20.9 Upon the creation of the Work Results, and at latest at the time of the acquisition, the Contractor shall grant the Principal the

exclusive, freely transferable right, without any restrictions as to area, content or time, to use the Work Results in all known media formats including electronic media, Internet and online media saved to all imaging, audio and data storage devices, for the contractually agreed purposes or purposes implied as per the Contract. The Principal accepts the granting of the right.

20.10 The Principal has the right in particular to exploit, duplicate and distribute the Work Results wholly or in part and to have the aforementioned activities carried out by third parties. The Principal also has the right to grant third parties the same complete rights to use the Work Results wholly or in part inclusive of any intermediate changes and revisions.

20.11 The Contractor shall also grant the Principal the right to adapt the Work Results. The right of the Principal to modify and adapt the Work Results includes the right to modify and adapt the buildings/engineering constructions and/or plants erected based on the Work Results or to have third parties modify and adapt them. This includes additions, reconstructions, conversions, expansions, changes of use, repairs, modernizations and demolition work on parts of or the entire building/engineering construction and/or parts of or the entire plant. Insofar as the use of the usage and exploitation rights granted in this clause threaten to violate the author's moral right in the sense of misrepresentation of the work in accordance with Section 14 of the German Copyright Act (UrhG), the Principal shall consult the Contractor before the modification or adaptation is conducted.

20.12 The Contractor may not otherwise use or exploit, including, without limitation, publish or use for advertising purposes, the Work Results or any templates or models created for them without the prior written consent of the Principal. The Contractor shall impose corresponding contractual obligations on all Vicarious Agents that it may employ to perform its contract.

20.13 Inalienable moral rights under copyright law are not affected by the provisions above.

20.14 The granting of the rights set out in Clauses 20.9, 20.10 and 20.11 is covered by the agreed remuneration.

20.15 In case the Contractor, in the course of the performance of the respective Contract, receives from the Principal or otherwise obtains personal data related to employees of Principal (hereinafter referred to as "Personal Data") the following provisions shall apply.

If processing of Personal Data disclosed in the aforementioned manner is not carried out on behalf of the Principal, Contractor shall only be entitled to process Personal Data for the performance of the respective Contract. Contractor shall not, except as permitted by applicable laws, process Personal Data otherwise, in particular disclose Personal Data to third parties and/or analyze such data for its own purposes and/or form a profile.

If and to the extent permitted by applicable laws, Contractor is entitled to further process the Personal Data, in particular to transmit Personal Data to its affiliated companies for the purpose of performing the respective Contract.

Contractor shall ensure that Personal Data is only accessible by its employees, if and to the extent such employees require access for the performance of the respective Contract (need-to-know-principle). Contractor shall structure its internal organization in a way that ensures compliance with the requirements of data protection laws. In particular, Contractor shall take technical and organizational measures to ensure a level of security appropriate to the risk of misuse and loss of Personal Data.

Contractor will not acquire ownership of or other proprietary rights to the Personal Data and is obliged, according to applicable laws, to rectify, erase and/or restrict the processing of the Personal Data. Any right of retention of Contractor with regards to Personal Data shall be excluded.

In addition to its statutory obligations, Contractor shall inform Principal in case of a Personal Data breach, in particular in case of loss, without undue delay, however not later than 24 hours after having become aware of it. Upon termination or expiration of

the respective Contract Contractor shall, according to applicable laws, erase the Personal Data including any and all copies thereof.

21. Publicity Ban, Severability Clause, Applicable Law, Place of Jurisdiction, Place of Fulfillment

21.1 The Contractor may only refer to or publicly disclose otherwise its business relationship with the Principal with the prior written consent of the Principal, or where this is unavoidable in order to fulfill the Contract.

21.2 The invalidity or unenforceability of any provision or part of a provision of the contract shall not affect the validity of the entire contract.

21.3 The Contract shall be construed and be subject to the laws of the Federal Republic of Germany with the exclusion of (i) the United Nations Convention on Contracts for the International Sale of Goods ("CISG") dated 11 April 1980 and (ii) the applicable law rules in Germany on the conflict-of-laws.

21.4 At the Principal's option the place of jurisdiction shall be either the court competent for the Principal's registered office or the court competent according to the applicable law.

21.5 Place of fulfillment is the Principal's registered office.
