News Release

BASF starts first MDI production in Chongqing

August 27, 2015 – Chongqing, China – BASF has begun its first production of diphenylmethane diisocyanate (MDI) at its wholly-owned site in Chongqing, China. Production will be ramped up gradually in line with market demand.

MDI is an important component for polyurethanes – an extremely versatile plastics material that contributes towards improved insulation, provides lighter materials for cars, and helps save energy in buildings. MDI production will support these key industries in China's western areas.

About BASF

At BASF, we create chemistry – and have been doing so for 150 years. Our portfolio ranges from chemicals, plastics, performance products and crop protection products to oil and gas. As the world's leading chemical company, we combine economic success with environmental protection and social responsibility. Through science and innovation, we enable our customers in nearly every industry to meet the current and future needs of society. Our products and solutions contribute to conserving resources, ensuring nutrition and improving quality of life. We have summed up this contribution in our corporate purpose: We create chemistry for a sustainable future. BASF had sales of over €74 billion in 2014 and around 113,000 employees as of the end of the year. BASF shares are traded on the stock exchanges in Frankfurt (BAS), London (BFA) and Zurich (AN). Further information on BASF is available on the Internet at www.basf.com.
