BASF welcomes reclassification of recyclability of coextruded polyethylene/polyamide film structures

The „Stiftung Zentrale Stelle Verpackungsregister“ (Central Agency Packaging Register) has reclassified the recyclability of polyamides in the minimum standard for assessing the recyclability of packaging subject to system participation pursuant to Section 21 (3) VerpackG: Since September 1, coextruded polyethylene (PE)/polyamide (PA) film structures have been recognized as mechanically recyclable.

“We appreciate the decision of the Stiftung Zentrale Stelle Verpackungsregister,” said Dr. Rolf-Egbert Grützner, Senior Manager Technical Support for Ultramid® extrusion polyamides at BASF. “It was time to correct the categorization of polyamide 6 and also the related PA6/6.6 co-polyamides and put them on a solid updated basis.”

As early as June 2021, the independent testing and certification facility cyclos-HTP systematically examined and confirmed the recyclability of PE/PA multilayer films on behalf of BASF.

The use of coextruded PE/ PA film structures in multilayer films makes it possible to produce very thin films (downgauging), which significantly reduces the use of plastics and also the amount of waste. BASF will present more about the value-adding use of polyamides at the K plastics trade fair from October 19 to 26 in Düsseldorf.

The reclassification is visible through the change in Annex 3 (fraction “Film and

LDPE (low-density polyethylene)”) of the minimum standard for the assessment of recyclability of packaging subject to system participation pursuant to Section 21 (3) VerpackG.

About BASF

At BASF, we create chemistry for a sustainable future. We combine economic success with environmental protection and social responsibility. Around 111,000 employees in the BASF Group contribute to the success of our customers in nearly all sectors and almost every country in the world. Our portfolio comprises six segments: Chemicals, Materials, Industrial Solutions, Surface Technologies, Nutrition & Care and Agricultural Solutions. BASF generated sales of €78.6 billion in 2021. BASF shares are traded on the stock exchange in Frankfurt (BAS) and as American Depositary Receipts (BASFY) in the U.S. Further information at www.basf.com.
