ONE SMART SPRAY precision spraying solution to be integrated with CNH Industrial's global agriculture brands

- **Integration of ONE SMART SPRAY technology with CNH Industrial's global Case IH and New Holland Agriculture brands**
- **Maximizing herbicide savings, input efficiencies and sustainability**
- **Day and night technology use to help expand crop treatment windows**

Cologne, Germany/London, United Kingdom – ONE SMART SPRAY, the smart spraying solution of a joint venture between Bosch and BASF, shall be integrated within CNH Industrial's agricultural brand product portfolios as the collaboration partners announced today.

Integration of the ONE SMART SPRAY solution will be led by the Raven team at CNH Industrial, with the unique technology to be commercially available in sprayers from the company's global Case IH and New Holland Agriculture brands.

ONE SMART SPRAY integration is an important solution that will fast track the further enhancement of CNH Industrial's precision and automated spraying capabilities. It will do so through multiple cameras installed on a sprayer's boom. This will provide customers with green-on-green (plant on plant) and green-on-brown (plant on soil) weed detection and selective spraying.

Precision is combined with digital tools and agronomic insights that are accessible via mobile devices to provide in-depth weed maps, track input and cost savings in real time and generate automated reports and data.

These deliver farmers clean fields while maximizing herbicide savings, operational efficiency, and sustainability. The ONE SMART SPRAY system also allows farmers to set up their desired spraying operations both in day and night conditions to expand their operating windows.

About Bosch BASF Smart Farming GmbH

Bosch BASF Smart Farming GmbH – a joint venture of Bosch and BASF – was established in 2021 to offer farmers the best of two worlds, joining the hardware, software and connectivity capabilities from Bosch and the digital and agronomic expertise of BASF Digital Farming. ONE SMART SPRAY makes precision smart by combining the best of precision technology, digital tools, and agronomic intelligence to take weed control to the next level and make agriculture more productive, profitable, and sustainable. About BASF's Agricultural Solutions division

Farming is fundamental to provide enough healthy and affordable food for a rapidly growing population while reducing environmental impacts. Working with partners and agricultural experts and by integrating sustainability criteria into all business decisions, we help farmers to create a positive impact on sustainable agriculture. That's why we invest in a strong R&D (Research & Development) pipeline, connecting innovative thinking with practical action in the field. Our portfolio makes up seeds and specifically selected plant traits, chemical and biological crop protection, solutions for soil management, plant health, pest control and digital farming. With expert teams in the lab, field, office and in production, we strive to find the right balance for success – for farmers, agriculture, and future generations. In 2022, our division generated sales of €10.3 billion. For more information, please visit www.agriculture.basf.com or any of our social media channels.

About CNH Industrial

CNH Industrial (NYSE: CNHI / MI: CNHI) is a world-class equipment and services company. Driven by its purpose of Breaking New Ground, which centers on Innovation, Sustainability and Productivity, the Company provides the strategic direction, R&D capabilities, and investments that enable the success of its global and regional Brands. Globally, Case IH and New Holland Agriculture supply 360° agriculture applications from machines to implements and the digital technologies that enhance them; and CASE and New Holland Construction Equipment deliver a full lineup of construction products that make the industry more productive. The Company's regionally focused Brands include: STEYR, for agricultural tractors; Raven, a leader in digital agriculture, precision technology and the development of autonomous systems; Flexi-Coil, specializing in tillage and seeding systems; Miller, manufacturing application equipment; Kongskilde, providing tillage, seeding and hay & forage

implements; and Eurocomach, producing a wide range of mini and midi excavators for the construction sector, including electric solutions.

Across a history spanning over two centuries, CNH Industrial has always been a pioneer in its sectors and continues to passionately innovate and drive customer efficiency and success. As a truly global company, CNH Industrial's 40,000+ employees form part of a diverse and inclusive workplace, focused on empowering customers to grow, and build, a better world.
