

Irgastab® Plus 5170 MG

synergetic blend of thermal stabilizers for hot melt adhesives

Item	Description		
Physical form	White micro granular powder		
Technical data*	Melting point	°C	>100
	Bulk density	g/l	~520

* No supply specification

■ Performance Highlight:

- ▶ Applicable for a wide range of hot melt adhesives
- ▶ Excellent color stability
- ▶ Superior adhesive protection against loss of adhesive values

■ Sustainability Highlight:

- ▶ Indirect food contact certificate available on request
- ▶ Dust-free product form
- ▶ Tin-free

- Irgastab® Plus 5170 is your superior choice when it comes to protecting your adhesive line in hot environments.
- It offers excellent processing due to the low melting temperature and stabilizes your adhesive formulation not only during manufacturing but also during use.
- It is particularly well-suited for pressure sensitive adhesives (PSA) based on styrene-block-co-polymers (SBC) but can also be used in other hot melt adhesives
