Our Mission

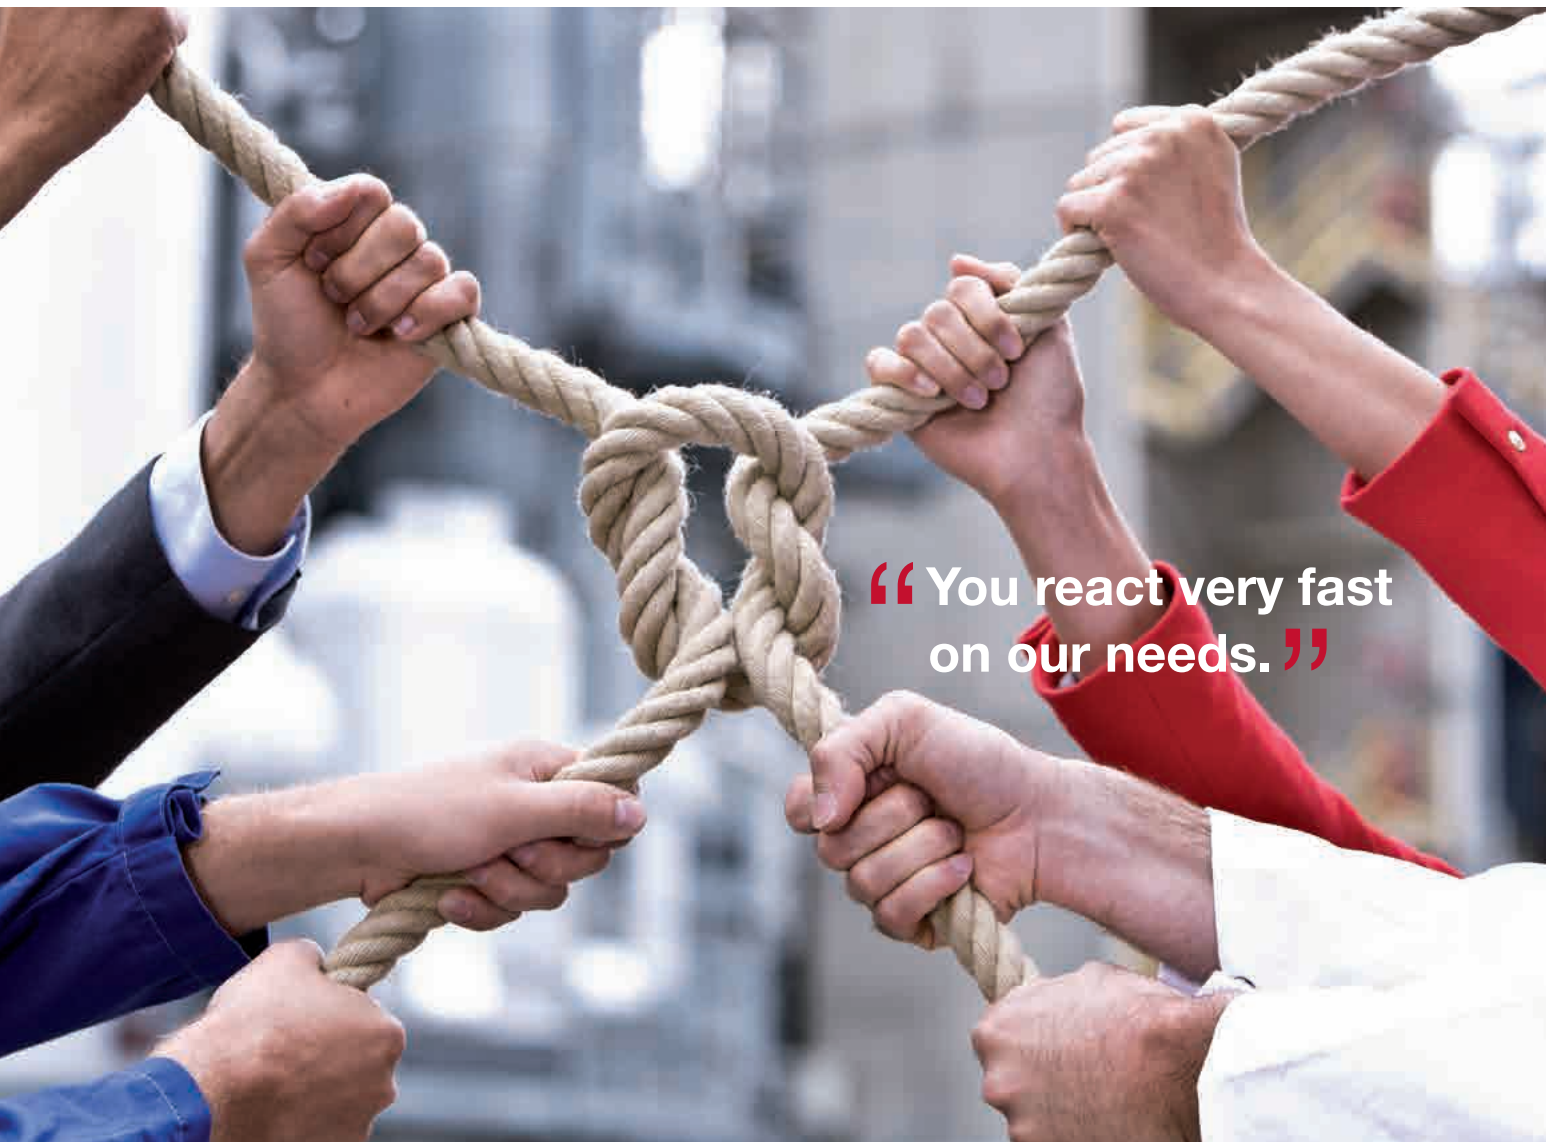

“We are the recognized,
reliable partner with highest
competence in oxygenated
Solvents.”

What We Do

We offer a broad and attractive product portfolio of highest quality and take advantage of the backward-integrated production. Our logistics solutions allow flexible deliveries and combined loadings as well as on-site tank farms.

PERFORMANCE

“You react very fast on our needs.”

As a reliable solvents partner, we help you to be more successful:

- Our expertise provides customers with a high degree of supply reliability throughout Europe and assists them in developing and implementing intelligent logistics concepts.
- Production in Europe is concentrated at BASF's largest site in Ludwigshafen and makes use of the benefits of the Verbund structure. The Verbund ensures the supply of raw materials and also enables our products to be manufactured efficiently.
- We have ISO 9001:2015, ISO 14001:2015 and ISO 50001:2011 certification from DQS GmbH.
- Solvents from BASF is part of the business unit Industrial Petrochemicals Europe. As part of BASF's Petrochemicals operating division, we develop, produce and market a broad range of acrylic monomers and specialty monomers, alcohols, solvents and plasticizers.

Are you looking for a secured supply of solvents with constant high product quality? Do you need a competent supplier in terms of safety, flexibility, fast delivery and regular exchange of know-how?

We are your reliable, trustworthy partner in oxygenated Solvents with an attractive product portfolio. Our local teams ensure your purchasing and handling run smoothly, giving you more time for your customers.

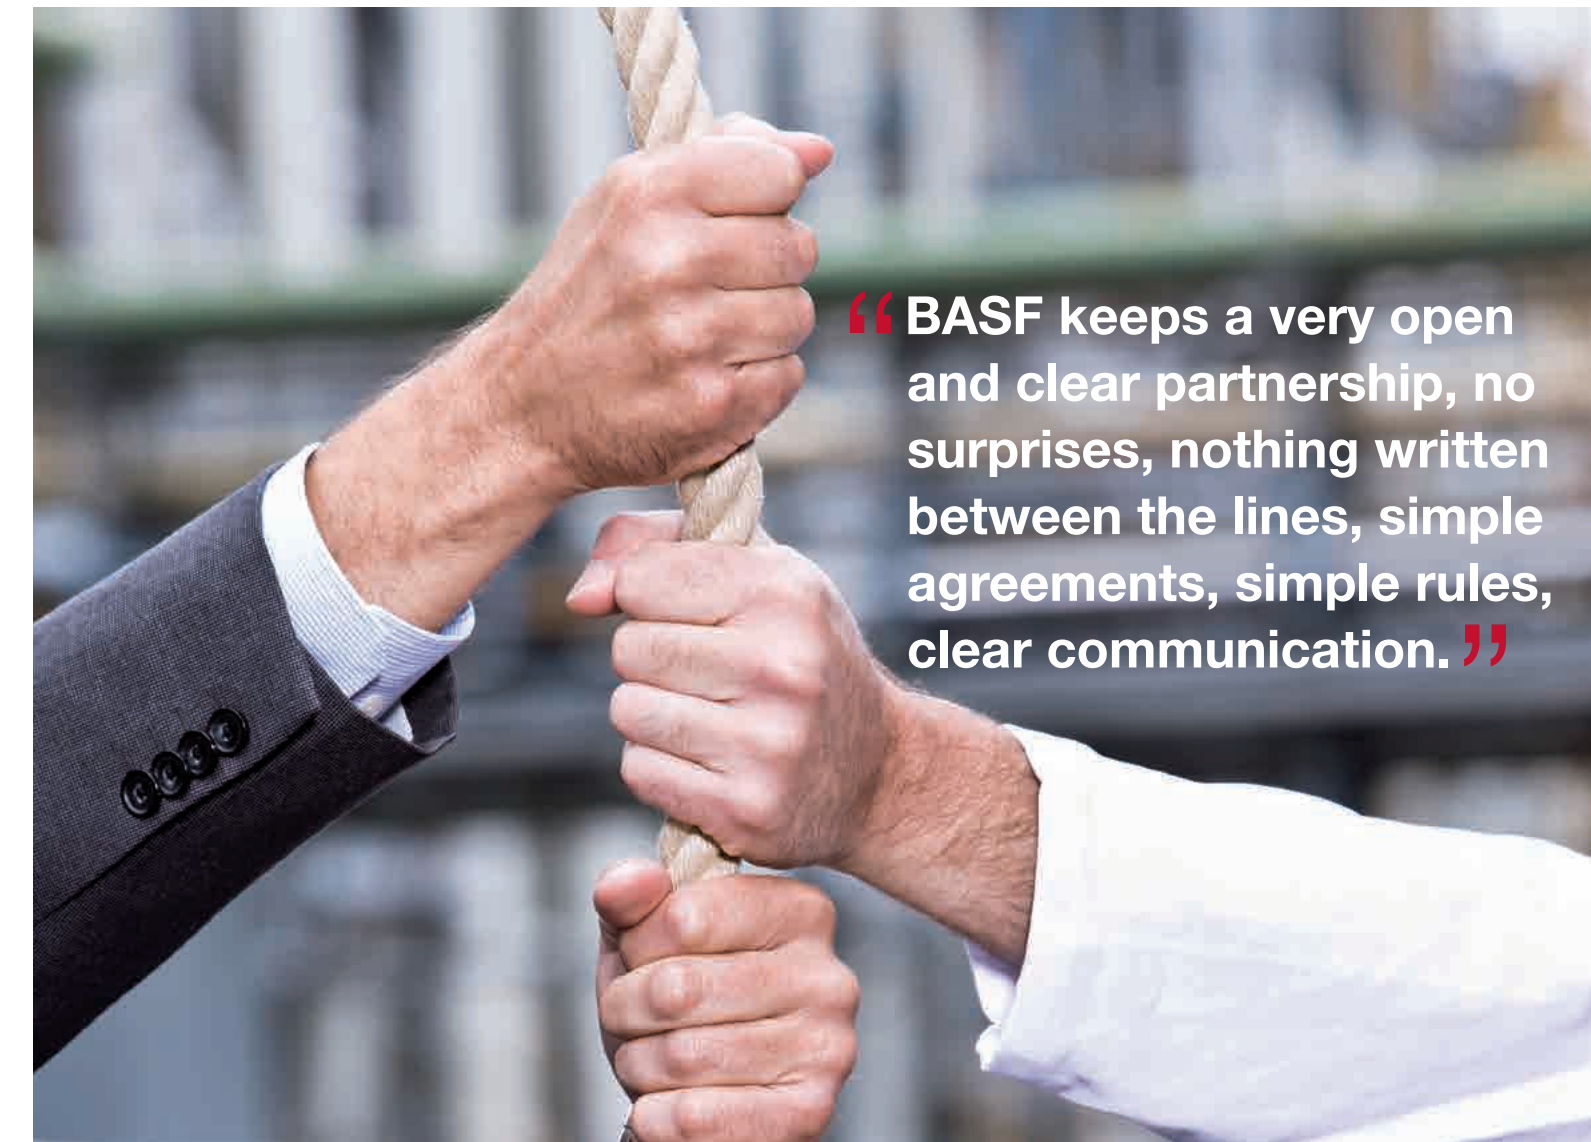

Relying on the unique Verbund of BASF as “The Chemical Company”, we are the strong and performing partner with excellent market knowledge for all your needs. Your quotes assure us that our long-lasting partnerships will guarantee your success today and in the future.

PARTNERSHIP PERFORMANCE TRUST RELIABILITY

What We Offer

We are able to provide competent solutions and react fast to your requirements. We collaborate closely with you to build up a successful, strong and long-lasting relationship. Being well-connected with the European markets, we are the right partner to mutually work out the optimal solution for your needs.

PARTNERSHIP

“BASF keeps a very open and clear partnership, no surprises, nothing written between the lines, simple agreements, simple rules, clear communication.”

What We Are
Being open, realistic and in close contact to our customers is the basis for our strong business relationships. We keep what we promise. A well-structured and transparent process together with high-level know-how on regulatories, product features and environmental topics also secures the supply of our products.

Our Products
Oxygenated Solvents from BASF comprise alcohols, glycol ethers and esters. These solvents are used mainly as precursors for coatings and paints. They are also used in products and manufacturing processes for detergents, pharmaceuticals, agrochemicals, lubricants, adhesives as well as cosmetics and personal care.

How We Act
Cooperating with us means relying on a stable supply of high-quality products. We characterize our business relations as long-term, as we aim to work closely together with you over many years. We are committed to product volumes, delivery dates and offers agreed upon.
