

Sustainability Quick Guide Furniture & Flooring Coatings

Sustainability demands in furniture & flooring coatings

Additives to meet the demands

Our formulation additives for furniture & flooring coatings enable formulators to produce finishes that preserve the beauty of coated wood while meeting the demand for efficient and environmentally compatible manufacturing.

Resource efficiency

With highly efficient rheology modifiers, we enable lower resource consumption without compromising performance.

Durability

Our effective dispersing and leveling agents support longer lasting coatings, which reduce the need for recoating and repair.

Lower emissions

BASF offers a full range of formulation additives that helps the industry move to water-based technologies to positively impact climate and indoor air quality.

Formulation additives for more sustainable furniture & flooring coatings
