

Sustainability Quick Guide General Industrial Coatings

Sustainability demands in general industrial coatings

Additives to meet the demands

With our formulation additives, a wide array of industrial coatings can be optimized for lower emissions, faster production, reduced consumption of raw materials and a longer lifespan.

Lower emissions

With additives that are suitable for both water-based and high-solid systems, we support formulators in replacing solvents with more environmentally friendly alternatives. Our low-VOC defoamers ensure efficient defoaming in water-based systems.

Resource efficiency

Our highly efficient wetting agents and surface modifiers allow industrial coating formulations that reduce energy consumption and increase throughput.

Durability

High-performance dispersing and leveling agents from BASF help to make industrial coatings more durable and resistant to weathering with reduced color fading and dirt pick-up for an extended service life.

Formulation additives for more sustainable general industrial coatings
