BASF – We create chemistry

# Isobionics® Santalol

A bio-based sandalwood note  
produced from renewable resources

The neutral woody odor profile of  
Isobionics® Santalol represents the  
heart note of sandalwood oil.

With its gentle elegance it can be easily  
introduced to all odor types conferring  
more volume and warmth.

The excellent cost positioning makes  
Isobionics® Santalol an attractive  
alternative to sandalwood oil.

Please contact your Isobionics® sales  
representative for recommendations  
to fit your specific needs:
