Dear subscribers,

For BASF, sustainability means more than just environmental management. This philosophy is the basis for our products and solutions, which are designed to provide the best possible results while ensuring the highest sustainability standards. BASF works together with partners around the globe to develop sustainable solutions, and we are always on the lookout for different ways to improve our impact. We believe that sustainability is a core value, which drives our innovation and decision-making processes.

From our latest news to current events, BASF offers a wide range of services and information on its website and through its social media platforms. Please visit our website for more detailed information on our sustainability efforts.

Yours,

The editorial team

BASF

Using raw materials in the Verbund

With BASF, we use our raw materials. We take care of them. We save them. We sell them. We make them...and more. In short, we handle the raw materials to provide value-added products.
