Dear subscribers,

BASF is at the forefront of change in the industry, focusing on how to achieve sustainable gains for the company and the environment. In our latest Sustainability News newsletter, we highlight recent developments in sustainability, innovation, and collaboration in the Chemical Industry. For this issue, we've included interviews with experts from some of our sustainable development initiatives and spotlighted recent developments in sustainability and innovation in the Chemical Industry. We hope you find our newsletter informative and interesting.

Your Editorial Team

Where does our oil come from?

For the first time, environmental and social problems caused by oil spills in the Adriatic Sea were discussed in an increasingly prominent position in the Chemical Industry. At the Forum, representatives of BASF shared their views and insights on this critical issue. The Forum was held in Split, Croatia, and BASF is proud to be a part of this important discussion on how we can work together to address the challenges faced by the Adriatic Sea and its surrounding communities. LED lighting project improves school learning environment

BASF has successfully completed a pilot project at a primary school in Croatia to improve the learning environment for students. The LED lighting system was installed in one of the classrooms and has significantly improved the lighting levels and comfort for students. As part of the ongoing sustainability efforts, BASF is committed to providing sustainable solutions that enhance the quality of life for all. Conservation of biodiversity

Conservation of biodiversity is a critical issue that requires collaboration between businesses and communities. In this issue, we have interviewed experts from the field who share their insights on how we can work together to protect the biodiversity of our planet. These experts discuss the importance of conservation efforts and the role that businesses can play in supporting these initiatives. Read the interview with Valter Martinovych (external link).

Farmer safety with the new Sarrancinal Kit

BASF has recently launched a new product, the Sarrancinal Kit, which is designed to improve safety for farmers working in the field. The kit includes a range of tools and equipment that help farmers perform their work more safely and efficiently. BASF is committed to providing innovative solutions that support the agricultural community and help make farming safer and more sustainable. Current publication: Sustainable Sourcing Steering Manual

BASF has released a new manual on sustainable sourcing, which provides guidance for companies on how to integrate sustainability into their supply chain management practices. The manual covers key aspects such as selection of suppliers, contract negotiations, and oversight of suppliers' performance. BASF is committed to working with suppliers who share our values of sustainability and are committed to improving the environmental and social impact of their operations. Download the manual here (external link).
