New silicone wetting agent with excellent defoaming performance

- Silicone-based wetting agent with pronounced defoaming performance for a wide variety of aqueous coating formulations

October 22, 2019 – BASF has recently introduced a new silicone wetting agent: Hydropalat® WE 3225, which combines excellent substrate wetting with pronounced defoaming performance.

Hydropalat® WE 3225 was created to fulfil the market demand for a wetting agent that would remove the need for an additional defoamer in a formulation. Customers can now have the freedom to add Hydropalat® WE 3225 without having to worry about the detrimental effects of foaming, such as air bubbles and pin-holes. In addition, Hydropalat® WE 3225 also offers the benefits of low VOC and low odor emissions.

Hydropalat® WE 3225 is designed for use in high-end water-based industrial and automotive coatings and especially wood coatings that require excellent wood grain accentuation. Its application can also be extended to printing ink applications.

BASF's Dispersions & Pigments division

The Dispersions & Pigments division of BASF develops, produces and markets a range of high-quality pigments, resins, additives and polymer dispersions worldwide. These raw materials are used in formulations for a number of industries, including coatings, construction, adhesives, printing and

packaging, electronics and paper. With its comprehensive product portfolio and its extensive knowledge of the industry, the Dispersions & Pigments division offers its customers innovative and sustainable solutions and helps them advance their formulations. For further information about the Dispersions & Pigments division, please visit www.dispersions-pigments.basf.com.

About BASF

At BASF, we create chemistry for a sustainable future. We combine economic success with environmental protection and social responsibility. The approximately 122,000 employees in the BASF Group work on contributing to the success of our customers in nearly all sectors and almost every country in the world. Our portfolio is organized into six segments: Chemicals, Materials, Industrial Solutions, Surface Technologies, Nutrition & Care and Agricultural Solutions. BASF generated sales of around €63 billion in 2018. BASF shares are traded on the stock exchange in Frankfurt (BAS) and as American Depositary Receipts (BASFY) in the U.S. Further information at www.basf.com.
