About this report

The “BASF in Japan” Report is published annually as a concise document about the performance of our activities across the three dimensions of sustainability – economy, environment and society – in Japan. The reporting period for this publication is the financial year 2020. This report also carries an overview of BASF Group along with its financial performance, prepared in accordance with the requirements of the International Financial Reporting Standards (IFRS), and, where applicable, the German Commercial Code as well as the German Accounting Standards (GAS). The emissions, waste, energy and water use of consolidated joint operations are included pro rata, based on our stake. The employee numbers refer to employees within the BASF Group scope of consolidation as of December 31, 2020.

BASF Group 2020 at a glance

Key data

		2020	2019	+/-
Sales	million €	59,149	59,316	-0.3%
EBITDA before special items ^a	million €	7,435	8,324	-10.7%
EBITDA ^a	million €	6,494	8,185	-20.7%

The BASF Group

At BASF, we create chemistry for a sustainable future. We combine economic success with environmental protection and social responsibility. The approximately 110,000 employees in the BASF Group work on contributing to the success of our customers in nearly all sectors and almost every country in the world. Our portfolio is divided into the Chemicals, Materials, Industrial Solutions, Surface Technologies, Nutrition & Care and Agricultural Solutions segments.

Organization of the BASF Group

We have 11 divisions grouped into six segments:

- **Chemicals:** Petrochemicals, Intermediates
- **Materials:** Performance Materials, Monomers
- **Industrial Solutions:** Dispersions & Pigments, Performance Chemicals
- **Surface Technologies:** Catalysts, Coatings
- **Nutrition & Care:** Care Chemicals, Nutrition & Health
- **Agricultural Solutions:** Agricultural Solutions

We take a differentiated approach to steering our businesses according to market-specific requirements and the competitive environment. We provide a high level of transparency around the results of our segments and show the importance of the Verbund and value chains to our business success. BASF aims to differentiate its businesses from their competitors and establish a high-performance organization to enable BASF to be successful in an increasingly competitive market environment.

In line with BASF's corporate strategy, the operating divisions, service units, the regions and a Corporate Center have formed the cornerstones of the BASF organization since January 1, 2020. We have streamlined our administration, sharpened the roles of services and regions, and simplified procedures and processes. These organizational changes have created the conditions for greater customer proximity, increased competitiveness and profitable growth.

Our divisions bear operational responsibility here and are organized according to sectors or products. They manage our 52 global and regional business units and develop strategies for the 75 strategic business units.

The regional and country units represent BASF locally and support the growth of business units with local proximity to customers. For financial reporting purposes, we organize the regional divisions into four regions: Europe; North America; Asia Pacific; South America / Africa / Middle East.

Together with the development units in our operating divisions, the three global research divisions – Process Research & Chemical Engineering, Advanced Materials & Systems Research and Bioscience Research – safeguard our innovative capacity and competitiveness.

Five service units provide competitive services for the operating divisions and sites: Global Engineering Services; Global Digital Services; Global Procurement; European Site & Verbund Management; Global Business Services (finance; human resources; environmental protection, health and safety; intellectual property; communications; procurement, supply chain and inhouse consulting services).

Following the bundling of services and resources and the implementation of a wide-ranging digitalization strategy, the number of employees in the Global Business Services unit worldwide will decline by up to 2,000 (from 8,000 currently) by the end of 2022. From 2023 onward, the division expects to achieve annual cost savings of over €200 million.

The Corporate Center units support the Board of Executive Directors in steering the company as a whole. These include central tasks from the following areas: strategy; finance; law, compliance and tax; environmental protection, health and safety; human resources; communications; investor relations and internal audit.

The ongoing Excellence Program is expected to contribute €2 billion to EBITDA annually from the end of 2021 onward compared with baseline 2018, including from the reduction of around 6,000 positions worldwide until the end of 2021. This decrease results from the organizational simplification and from efficiency gains in administration, the service units and the operating divisions. In addition, central, functional and regional structures are being streamlined in connection with portfolio changes.

To increase reporting transparency, the figures for investments accounted for using the equity method were restated in the first quarter of 2020. Some investments are not an integral part of the BASF Group. These include, in particular, the shares in Wintershall Dea GmbH, Kassel/Hamburg, Germany, and Solenis UK International Ltd., London, United Kingdom. Since the first quarter of 2020, these have been classified as purely financial investments and reported separately from the shareholdings that are integral to the main business activities of the BASF Group. One material equity-accounted interest that has been classified as integral is BASF-YPC Company Ltd., Nanjing, China. Income from non-integral companies accounted for using the equity method is no longer presented in the BASF Group's EBIT and EBIT before special items, but under net income from shareholdings. Due to its increased significance, this will be presented as a separate subtotal within income before income taxes and is no longer part of the financial result. Integral and non-integral investments accounted for using the equity method are also presented separately in the balance sheet. The statement of income for 2019 has been restated accordingly.

On September 30, 2020, BASF completed the divestiture of its construction chemicals business to an affiliate of Lone Star, a global private equity firm, as agreed in December 2019.¹ The purchase price on a cash and debt-free basis was €3.17 billion. The Construction Chemicals division was previously reported under the Surface

¹ The construction chemicals business was transferred in two steps, on September 30, 2020, and on November 30, 2020.

Technologies segment. The divested construction chemicals business had around 7,500 employees and operated production sites and sales offices in more than 60 countries. It generated sales of around €2.6 billion in 2019. The disposal gain and the income after taxes of the construction chemicals business until closing are presented in the income after taxes of BASF Group as a separate item (“Income after taxes from discontinued operations”).

Sites and Verbund

BASF has companies in around 90 countries. We operate six Verbund sites and 241 additional production sites worldwide. Our Verbund site in Ludwigshafen, Germany, is the world’s largest chemical complex owned by a single company that was developed as an integrated network. This was where the Verbund principle was originally established and continuously optimized. We then implemented it at additional sites. In 2020, we started construction of the first plants at the planned integrated Verbund site in Zhanjiang, China.

The Verbund system is one of BASF’s great strengths. We add value by using our resources efficiently. The Production Verbund intelligently links production units and their energy supply so that, for example, the waste heat of one plant provides energy to others. Furthermore, one facility’s by-products can serve as feedstocks elsewhere. This not only saves us raw materials and energy, it also avoids emissions, lowers logistics costs and leverages synergies.

We also make use of the Verbund principle for more than production, applying it for technologies, the market and digitalization as well. Expert knowledge is pooled in our global research divisions.

Procurement and sales markets

BASF supplies products and services to around 90,000 customers¹ from various sectors in almost every country in the world. Our customer portfolio ranges from major global customers and small and medium-sized enterprises to end consumers.

We work with over 70,000 Tier 1 suppliers² from different sectors worldwide. They supply us with important raw materials, chemicals, investment goods and consumables, and perform a range of services. Important raw materials (based on volume) include naphtha, liquid gas, natural gas, benzene and caustic soda.

Business and competitive environment

BASF’s global presence means that it operates in the context of local, regional and global developments and a wide range of conditions. These include:

- Global economic environment
- Legal and political requirements (such as European Union regulations)
- International trade agreements

- Industry standards
- Environmental agreements (such as the E.U. Emissions Trading System)
- Social aspects (such as the U.N. Universal Declaration of Human Rights)

BASF holds one of the top three market positions in around 70% of the business areas in which it is active. Our most important global competitors include Arkema, Bayer, Clariant, Corteva, Covestro, Dow, Dupont, DSM, Evonik, Huntsman, Lanxess, SABIC, Sinopec, Solvay, Sumitomo Chemical, Syngenta, Wanhua and many hundreds of local and regional competitors. We expect competitors from Asia and the Middle East in particular to gain increasing significance in the years ahead.

Corporate legal structure

As the publicly traded parent company of the BASF Group, BASF SE takes a central position: Directly or indirectly, it holds the shares in the companies belonging to the BASF Group, and is also one of the largest operating companies. The majority of Group companies cover a broad spectrum of our business. In the BASF Group Consolidated Financial Statements, 273 companies including BASF SE are fully consolidated. We consolidate nine joint operations on a proportional basis, and account for 25 companies using the equity method.

¹ The number of customers refers to all external companies (sold-to parties) that had contracts with the BASF Group in the business year concerned under which sales were generated.

² BASF considers all direct suppliers of the BASF Group in the business year concerned as Tier 1 suppliers. These are suppliers that provide us with raw materials, investment goods, consumables and services. Suppliers can be natural persons, companies or legal persons under public law.

Our Strategy

Corporate Strategy

At BASF, we are passionate about chemistry and our customers. We want to be the world's leading chemical company for our customers, grow profitably and create value for society. Thanks to our expertise, our innovative and entrepreneurial spirit, and the power of our Verbund integration, we make a decisive contribution to changing the world for the better. This is our goal. This is what drives us and what we do best: We create chemistry for a sustainable future.

The world is facing major challenges. Climate change is advancing, the world's population is growing and so is its need for food. More and more people live in cities and the demand for individual mobility is rising. At the same time, natural resources are limited. More than ever before, we need solutions that make sustainable growth possible. Chemistry plays a key role here. It can help to overcome global challenges in almost all areas of life. By combining our expertise with our customers' competence, we can together develop sustainable and profitable solutions.

Our innovations, products and technologies help to use natural resources more efficiently, produce enough food for everyone, reduce emissions, enable climate-smart mobility, improve the capabilities of renewable energy, and make buildings more energy efficient, among other things. Our purpose reflects what we do and why we do it: We create chemistry for a sustainable future.

Our corporate purpose

We create chemistry for a sustainable future

We want to continue to grow profitably and make a positive contribution to society and the environment. We see disruptive changes in the chemical industry – like the advance of digitalization, the development of circular economy models or the transformation to climate-neutral production – as an opportunity. We have set ourselves ambitious targets along the entire value chain.

Our customers and their needs are at the core of our strategy. We want to maintain our leading position in an increasingly competitive environment. To achieve this, we are accelerating our innovation processes and deepening cooperation with our customers. We are systematically aligning our portfolio with growth areas and integrating sustainability into our value chains even more strongly. Our Verbund structure is the basis for efficient, safe and reliable production both now and in the future. We leverage digital technologies to continuously improve processes and customer relationships, for example. We create a working environment that best enables our employees to contribute to BASF's success.

Customer focus

Our customers are our number one priority. BASF supplies products and services to around 90,000 customers¹ from various sectors in almost every country in the world. Our customer portfolio ranges from major global customers and small and medium-sized enterprises to end consumers. Our comprehensive product portfolio means that we are active in many value chains and value creation networks. We use various business strategies, which we adapt to the needs of individual industries and markets. These range from cost leadership in basic chemicals to tailored, customer-specific system solutions.

We want to be our customers' most attractive partner for all challenges that can be solved with chemistry. This is why we continue to drive forward our focus on customers and their needs. We are refining our organizational structure so that our operating divisions can flexibly address specific market requirements and differentiate themselves from the competition. In addition, we are simplifying and digitalizing our processes to make the way we work more effective, more efficient and more agile.

Ultrasim®: Shorter development times thanks to virtual simulation

Technical progress requires innovative materials. This is why engineering plastics are being used in more and more sectors and applications. They are often significantly lighter than conventional materials, are usually easier to process and offer advantages such as heat and impact resistance or mechanical strength. As a leading manufacturer, BASF not only offers a comprehensive portfolio of high-performance plastics, but also has extensive expertise in computer-aided engineering (CAE). Ultrasim, our virtual simulation tool, covers the entire process chain – from the selection of suitable materials and the development of virtual prototypes to the optimal production process for the component. Our customers find out quickly, precisely and reliably how our materials behave in specific applications. This reduces development times and saves costs for complex tests.

For more information on Ultrasim, see [basf.com/en/ultrasim](https://www.basf.com/en/ultrasim)

¹ The number of customers refers to all external companies (sold-to parties) that had contracts with the BASF Group in the business year concerned under which sales were generated.

We are continuously increasing transparency for our customers and improving our customer service with a range of measures. For instance, we have used the Net Promoter System® since 2019. We are constantly improving our problem-solving skills, product quality and delivery reliability based on customer feedback. In 2020, we also started the global rollout of Salesforce, a new, integrated IT-based customer relationship management system. The user-friendly application helps sales employees deliver even better customer support and simplifies their work.

Innovations and tailored solutions

in close partnership with our customers

Above and beyond this, we want to intensify cooperation with our customers and leverage growth potential together with them. For instance, we have created interdisciplinary teams in our business units to even better and more quickly address the needs of our most important customers. Cooperation and innovation are also the focus at our Creation Centers in Ludwigshafen, Germany; Mumbai, India; Shanghai, China; and Yokohama, Japan. These creative centers bring together our comprehensive materials, design, and digital development expertise in high-performance plastics using the latest visualization and collaboration technologies. This enables us to transform our customers' ideas into tailored products and applications even more quickly – everything in one place, from initial inspiration to solution.

Customer awards

We again received awards from a number of satisfied customers in 2020. In North America, for example, BASF was recognized by General Motors (GM) in June as a 2019 Supplier of the Year for the fifteenth time since 2002. The award is presented to suppliers who exceed GM's expectations around quality, execution, innovation and total enterprise cost. GM also honored us with the Overdrive Award for our sustainable construction solutions. BASF products help GM to meet key sustainability targets – such as a smaller carbon footprint and water and energy savings – at two of its plants.

In Europe, the global surface treatments business in our Coatings division, which operates under the Chemetall brand, received the Airbus Supply Chain & Quality Improvement award in February 2020 for the sixth time. It acknowledges Chemetall's performance, strong continuous improvement and customer-oriented approach in line with Airbus' targets and expectations.

In Asia Pacific, we received an award from Godrej Interio, India's leading home and commercial furniture brand, in the category "Best Overall Performance" in July. BASF has supplied Godrej with Elastoflex and Ultramid products since 2008. The award particularly recognizes delivery reliability and innovation. In September, this was followed by the CIIF New Materials Award, presented by the organizers of the China International Industry Fair in Shanghai. The award recognizes BASF for its modification of the intermediate PolyTHF,

which is used to produce elastic spandex textile fibers. The next generation offers our customers easier processing and products with improved stretch characteristics.

In Brazil, we received several awards in 2020. BASF's Coatings division markets a broad portfolio of decorative paints here under the Suvinil brand. The national association of construction material traders (Associação Nacional dos Comerciantes de Material de Construção) selected Suvinil as the most popular brand for wall, ceiling and exterior paints with the Anamaco award in the wholesale category. The award was based on a survey of more than 1,600 traders conducted by the industry association. The market research institute Instituto Melhores Empresas em Satisfação do Cliente (MESOC) also confirmed that Suvinil customers are satisfied customers. According to a poll of over 250 companies and 41,000 customers conducted by the institute, Suvinil is one of the brands with the highest customer satisfaction ratings in the construction and decorative materials segment.

Quality management

Our customers' satisfaction is the basis for our success, which is why quality management is of vital significance for BASF. We strive to continually improve processes and products. This is also reflected in our Global Quality Policy. The majority of our production sites and business units are certified according to ISO 90011. In addition, we also meet industry and customer-specific quality requirements such as IATF 16949 certification for the automotive industry.

Our strategic action areas

We have defined six strategic action areas through which we will sharpen our customer focus and achieve our goals.

Innovation

Innovation is the bedrock of our success. BASF is an innovation leader in the chemical industry, with around 10,000 employees in research and development and R&D spending of around €2.1 billion. We continue to build on these strengths by bringing research and development closer together and making our customers' demands a greater part of our innovation process. We involve them at an earlier stage and are expanding our partnerships with customers and external partners.

Sustainability

A key driver is sustainability. We want to create value for the environment, society and business with our products, solutions and technologies. Therefore, we are increasing the relevance of sustainability in our steering processes and business models. This establishes us as a key partner supporting our customers, opens up new growth areas and secures the long-term success of our company.

Operations

Our core business is the production and processing of chemicals. The Verbund offers us many technological, market, production-related and digital advantages. Our comprehensive product portfolio, which ranges from basic chemicals to custom system solutions, enables us to meet the increasingly diverse needs of our customers with a differentiated offering.

Digitalization

Digitalization is an integral part of our business. We want to significantly improve the availability and quality of our process data. To achieve this, we will digitalize processes at more than 420 plants worldwide by 2022. We will systematically analyze this data to further automate processes and in this way, increase efficiency. Combining internal and external data provides many new opportunities to manage our businesses more efficiently, improve processes and create value added for our customers.

Portfolio

With our acquisitions and divestitures, we have oriented our portfolio toward innovation-driven growth areas. The acquisition of the integrated polyamide business from Solvay and the purchase of various businesses from Bayer further strengthened our position in engineering plastics and in the agricultural sector. The Asian market will play a key role in our future growth. Our strong innovation, production and sales base in China enables us to respond to the needs of our customers in a differentiated way. To further strengthen our position in this dynamic growth market, we plan to build an integrated Verbund site in Zhanjiang.

Employees

Our employees are key to BASF's success. That is why we believe that it is important to have a working environment that fosters employees' individual talents and enables them and their teams to perform at their best. We are giving our employees more individual freedom. At the same time, we encourage and promote a leadership culture that empowers our employees to respond to customer needs quickly and efficiently with a solution orientation.

Corporate values

guide our conduct and actions

Creative: We make great products and solutions for our customers. This is why we embrace bold ideas and give them space to grow. We act with optimism and inspire one another.

Open: We value diversity, in people, opinions and experience. This is why we foster feedback based on honesty, respect and mutual trust. We learn from setbacks.

Responsible: We value the health and safety of people above all else. We make sustainability part of every decision. We are committed to strict compliance and environmental standards.

Entrepreneurial: We focus on our customers, as individuals and as a company. We seize opportunities and think ahead. We take ownership and embrace personal accountability.

Our targets

Business success tomorrow means creating value for the environment, society and business. That is why we have set ourselves ambitious global targets along our entire value chain and the three dimensions of sustainability. We report transparently on our target achievement so that our stakeholders can track our progress.

We want to grow faster than the market, further increase our profitability, achieve a return on capital employed (ROCE) considerably above the cost of capital percentage and increase the dividend per share every year based on a strong free cash flow. In addition to these financial targets, we pursue broad sustainability targets. For example, our new 2030 goal is to reduce greenhouse gas emissions from our

production sites and our energy purchases worldwide by 25 percent compared with 2018 while growing production volumes. We want to strengthen the sustainability focus of our product portfolio and significantly increase sales of Accelerator products. We also strive to strengthen sustainability in our supply chains and use natural resources responsibly. We want to further improve safety in production. In addition, we aim to promote diversity within the company and create a working environment in which our employees can thrive and perform at their best.

The objective of these targets is to steer our business into a sustainable future, and at the same time, contribute to the implementation of the United Nations' Sustainable Development Goals (SDGs).

Status of Target Achievement in 2020

Profitable growth	SDG ¹	Target	2020 status	Responsible procurement	SDG ¹	Target	2020 status
Achieve a return on capital employed (ROCE) considerably above the cost of capital percentage every year	 	>9%	1.7%	Cover 90% of our relevant spend with sustainability evaluations by 2025	 	90%	80%
Grow sales volumes faster than global chemical production every year	 	>-0.4%	-0.5%	Have 80% of our suppliers improve their sustainability performance upon re-evaluation	 	80%	68%
Increase EBITDA before special items by 3%–5% per year	 	3%–5%	-10.7%	Resource efficiency and safety		Target	2020 status
Increase the dividend per share every year based on a strong free cash flow	 	>€3.30	€3.30 ²	Reduce worldwide process safety incidents per 200,000 working hours to ≤0.1 by 2025	 	≤0.1	0.3
Effective climate protection³		Target	2020 status	Reduce the worldwide lost-time injury rate per 200,000 working hours to ≤0.1 by 2025		≤0.1	0.3
Reduce our absolute CO ₂ emissions by 25 percent by 2030 (Development of carbon emissions compared with baseline 2018)		≤16.4 MMT	20.8 MMT	Introduce sustainable water management at our production sites in water stress areas and at our Verbund sites by 2030	 	100%	46.2%
Sustainable product portfolio		Target	2020 status	Employee engagement and diversity		Target	2020 status
Achieve €22 billion in Accelerator sales by 2025	   	€22.0 billion	€16.7 billion	Increase the proportion of women in leadership positions with disciplinary responsibility to 30% by 2030		30%	24.3%
				More than 80% of our employees feel that at BASF, they can thrive and perform at their best		>80%	82%

At a glance

BASF in Japan

At a Glance

BASF has been a committed partner to Japan since 1888. Operating both production sites as well as research and development facilities in Japan, BASF contributes to the success of Japanese customers nationwide as well as globally by providing products and solutions to nearly all industries. These include the automotive, construction, pharmaceutical, medical, electronics, electric, packaging, home and personal care, agriculture and food industries.

BASF's relationship with Japan stretches back to the Meiji era, when our Indigo Pure BASF dyes were imported for Japan's traditional, navy blue "Kon-Gasuri" pattern. Color Chemie Trading Co., Ltd., the precursor of BASF Japan Ltd., was established in 1949.

Today, BASF operates 6 production sites nationwide. In Totsuka, we produce and develop coating solutions for automotive companies; in Kitatone, we produce and develop emollients and waxes for personal care; in Kasumi, we produce and develop thermoplastic polyurethanes (TPU); and in Rokuromi we produce dispersions. BASF also operates BASF Metals Japan Ltd., trading precious metals products.

BASF collaborates closely with Japanese partners. These partnerships include BASF TODA Battery Materials LLC, a joint venture with TODA KOGYO CORP., which produces and sells lithium ion battery materials. We also maintain BASF INOAC Polyurethanes Ltd., a joint venture with INOAC Corporation, for polyurethane materials, systems, elastomers, and N.E. Chemcat Corporation, a joint venture with Sumitomo Metal Mining Co., Ltd., for our catalysts business.

In the area of research and development (R&D), Japan plays an important role in BASF's global network. In Amagasaki, BASF operates the Amagasaki R&D Center, which also hosts Research and Development Laboratory and the Application Technology Center for Battery Materials. BASF's Yokohama Innovation Center is the location of the Engineering Plastic Innovation Center and our Creation Center. BASF also operates AgSolution Farm Naruto, an agricultural solution research farm for crop protection products.

BASF Japan provides an activity-based workplace in its head office.

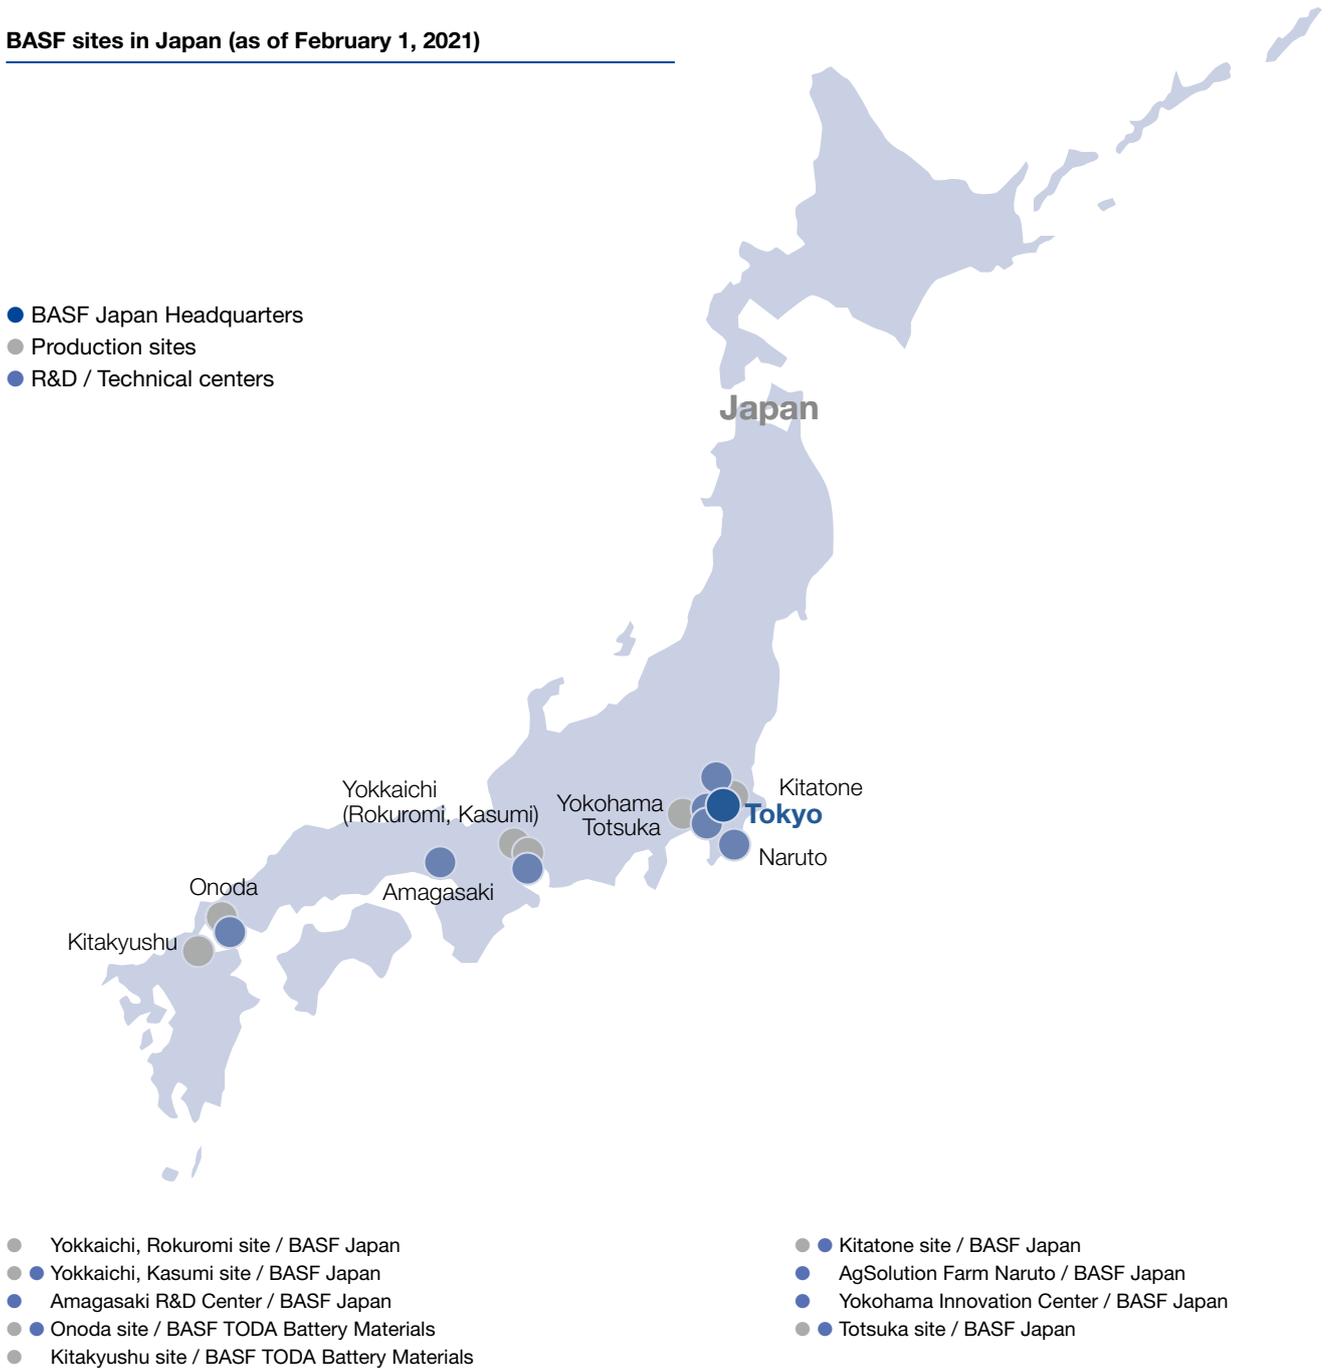

Kitatone site produces and develops emollients and waxes for personal care and home care industries.

AgSolution Farm Naruto, a research farm for crop protection products

Solutions for Japan's Major Industries

BASF's activities in Japan include activities from all global business segments: Chemicals, Materials, Industrial Solutions, Surface Technologies, Nutrition & Care and Agricultural Solutions. With this broad business portfolio, BASF provides products and solutions to nearly all industries, including the automotive, construction, pharmaceutical, medical, electronics, electric, packaging, personal and home care, agriculture and food industries – contributing to the success of Japanese customers nationwide as well as globally.

Automotive industry

BASF is the world's largest automotive supplier in the chemical industry. Also in Japan, we provide products for every part of the car, from the engine to the interior/exterior, and we offer a diverse set of solutions to reduce the environmental impact of manufacturers.

BASF automotive solutions contribute to emissions reduction, heat management, e-mobility, lightweight construction and fuel efficiency as well as other innovations.

BASF solutions for the automotive industry include:

Engineering plastics for parts surrounding the engine, interiors/exterior, e-mobility and suspensions, battery materials for lithium-ion batteries, polyurethane for car interior parts, damping materials inside suspensions, coolant and brake fluids, automotive coatings, refinish coatings, automotive catalysts, etc.

Construction industry

BASF provides solutions that make construction faster and more efficient and contribute to sustainable buildings by increasing labor efficiency, reducing energy consumption, increasing the lifespan and durability of buildings.

BASF provides innovative solutions that support sustainable building for the construction industry.

BASF products for the construction industry include:

Thermal insulation material, acoustic absorbent, high-performance polyamide, light stabilizers, plastic additives, wetting agent, dispersion, etc.

Pharmaceutical and medical device industry

In light of Japan's changing demographics and governmental policy for healthcare, BASF is working to develop products that contribute to the growing needs of the medical and health industries. In addition to providing active ingredients and additives that ensure safe and innovative manufacturing of medicines, BASF is also active in the medical, health management and nursing fields.

BASF supports innovations in medication and health management.

BASF products for the pharmaceutical and medical industry include:

Pharmaceutical additives such as solvents, catalysts, reagents, medicinal contents of pharmaceuticals, solubilizers, and non-phthalate plasticizers, etc.

For solutions for other industries, please refer to this link

Electronics, electric and information industries

With Japan as an international leader in electronics, BASF provides a wide variety of products in this area, such as solutions for display monitors as well as cutting-edge innovations for digitalization and clean energy, through sensors and information processing devices.

BASF offers a spectrum of solutions to the electronics industry to help achieve sustainability and innovation goals.

BASF products for the electronics, electric and information industries include:

Materials for displays, such as organic pigments for LCD panels, and photoinitiators for color filters in LCD panels; materials for infrastructure, such as lubricating oils for electric machinery and hydraulic oil, and metalworking additives; materials for electronic components, such as engineering plastics; as well as near infrared (NIR) sensor and NIR spectroscopy solutions.

Packaging industry

BASF provides products for packaging materials to lock in freshness and make foods last longer, as well as materials that contribute to new designs and weight reduction. BASF also produces certified, fully-compostable polymers for packaging and other applications.

New developments in packaging are supported by BASF solutions.

BASF products for the packaging industry include:

High value-added packaging material, such as high-strength polyamides for nylon films, ultraviolet-absorbing agents for PET bottles, as well as materials for recyclable and compostable packaging, such as compostable plastic and internal coating agents to replace laminates, etc.

Personal care and home care industries

BASF provides products that are essential for everyday items, including skincare, hair care products and laundry detergents, to keep daily lives comfortable.

BASF products are essential to daily life.

BASF products for the personal care and home care industries include:

Raw materials for skincare and hair care cosmetics, such as surfactants, polymers, emollients, and ultraviolet filters, as well as materials for home care and industrial-use cleansers, such as surfactants, chelating agents, biocides, stabilizers, etc.

Agriculture and food industries

BASF is supporting Japan's agriculture and food industries, from the production process with agricultural solutions that make efficient crop protection possible, to enhanced human nutrition with vitamins to supplement nutrients, as well as additives for animal feed that make animal husbandry more sustainable.

BASF works with growers and cooperative associations throughout Japan.

BASF products for the agriculture and food industries include:

Fungicides, insecticides, herbicides and digital farming solutions "xarvio[®]" for agriculture, as well as a range of solutions for human and animal nutrition, etc.

Key Data of BASF in Japan

		2020	2019	2018

a We have applied International Reporting Standards IFRS 10 and 11 as well as International Accounting Standard 19 (revised) since January 1, 2013. Figures for 2012 have been restated; no restatement was made for 2011 and earlier.

b Figures for 2013 have been adjusted to reflect the dissolution of the natural gas trading business disposal group.

c Figures for 2017 were restated with the presentation of the oil and gas activities as discontinued operations.

d Figures for 2018 were restated with the presentation of the construction chemicals activities as discontinued operations.

e Calculated in accordance with German GAAP

On this page:

With 10 square kilometers in the heart of Europe, the Ludwigshafen Verbund Site is the World's largest integrated chemical complex in the world. A dense network of around 200 production plants provides excellent conditions for the production of complex and highly refined products. As a technology platform and competence center for the BASF Group, the site is an important source of innovation in products, methods and processes.
