

 **BASF**

We create chemistry

BASF Aroma Ingredients

Together, we create memorable emotions for everyone – while caring for future generations

We put **sustainable innovation** at our core – for everyone to enjoy

We are passionate to support you with innovative flavor and fragrance ingredients that meet highest quality and purity standards, transparency and product performance.

We build on our scientific strength, an excellent regulatory know-how, a global supply network and two world-scale aroma ingredients production sites to offer a broad portfolio from **six scent clusters**: rose, citrus, lavender, muguet, mint, selected sensations.

We are committed to creating sustainable high-class aroma ingredients that are based on renewable feedstock, thus saving fossil resources and reducing carbon emissions. The replacement of fossil feedstock is possible through BASF's biomass balance approach.

Join us in making a conscious contribution shaping a sustainable future that does not only smell and taste memorable but is also a place for new generations to enjoy.

How does BASF's biomass balance approach work?

- Use of **renewable feedstock** such as biomethane
- **Allocation of renewable feedstock** to specific product
- **Independent certification** by a third party

Why would you choose our certified biomass balance products (BMBcert™)?

- **Save fossil resources** and **reduce greenhouse gas emissions**
- Quantified **CO₂ equivalent savings for each product** help you to meet your sustainability targets
- **No need for reformulation:** rely on an identical chemical and olfactory product quality and performance

Rose: the classic spirit of emotions

There is no inspiration without rose. Choose from eleven high-quality rose aroma ingredients – from warm rose to fruity or herbal rose notes – and start creating your valuable compositions.

Rose
