Greenville, Ohio

Address: 1175 Martin Street, Greenville, Ohio 45331

Start of Production: 1974

Location: Located in Darke County at the intersection of U.S. Route 127 and U.S. Route 36; 35 miles northwest of Dayton; 11 miles east of the Ohio/Indiana border.

Site Manager: Bobby Balentine

Number of Plants: 1

Number of Employees: 136

Product/Uses:

- **Clearcoat:** This is the final coating layer on an automobile. It provides a clear, lustrous and durable finish.
- **Electrocoat:** This is the first coating layer on an automobile. It provides corrosion protection and prepares the surface for additional coating layers.
- **Resins:** A variety of resins including acrylics, polyurethanes, polyesters and epoxies are manufactured at the Greenville site. The resins are used to produce a variety of coatings for automotive (both OEM and refinish) applications.

Community Relations:

- BASF is more than just a business or an employer. We are part of a community. We seek to contribute to the health and well-being of the community by contributing to programs that improve the quality of life for residents.
- Title sponsors of the regional “Upper Miami Valley Science Days”; a series of school science fairs.
- We have strong ties to our local United Way affiliate, which supports a variety of critical programs within the community, along with Main Street Greenville, Darke Co. Special Olympics, The Light Foundation and others.

Economic Impact:

- \$21 million invested in plant and equipment *
- Annual payroll of \$17.5 million*
- Payment of \$153,106 in local and state taxes*

*Year-end 2018 data
