## Tarrytown, NY

**Address:** 500 White Plains Road Tarrytown, NY 10591

**Start of Operation:** Built in the mid 1990s by Ciba Specialty Chemicals as a corporate research center. BASF Corporation acquired Ciba in 2009.

**Location:** Approximately 20 miles north of Manhattan at the Hudson River, east of the Mario M. Cuomo Bridge (Interstate 287).

**Site Manager:** Thomas Hayden

**Number of Employees:** 175, plus contractors

**Main R&D activities:** The Tarrytown facility is one of six BASF Research & Development hubs in North America. It has a long history in the development of high performance additive and stabilization technologies, and groundbreaking work in thermal and light stabilizers. Current R&D activities include:

- Plastic Additives (Antioxidants; Light Stabilizers)
- Pharma Ingredients (Actives; Binders)
- Nutrition Ingredients (Actives; Supplements)
- Personal Care Ingredients (Skin, Hair Care)
- Color & Effect Materials for Coatings and Cosmetics
- Fuel and Lubricant Solutions
- White Biotechnology
- Formulation Science & Technology
- Scientific Computing & Modeling
- Analytical Science & Elucidation

### Community Relations:

BASF Tarrytown partners with the Tarrytown Food Bank, supports those in need in the local community through WestCOP, and partners with the Visiting Nurse of Westchester Hospice program. Additionally, BASF Tarrytown supports a number of national charities through fund raising activities. Being a Research and Technical Center, BASF Tarrytown is committed to science education and STEAM programs throughout Westchester.

### Economic Impact:

- Annual Payroll plus benefits of \$27.4 million for site-based employees\*
- Payment of \$1.4 million in local Town of Greenburgh property taxes\*
- Capital investment of \$2.6 Million on the site in 2018\*
