Savannah, Georgia

ADDRESS | 1800 East President Street, Savannah, Georgia 31404-1020

START OF OPERATIONS | 1983

LOCATION | The site is located along the southern shore of the Savannah River, just east of the City of Savannah. Travel time from Savannah International Airport is approximately 30 minutes.

SITE MANAGER | Jim Morse

Product/Uses:
The Savannah site includes two multi-floored manufacturing buildings, a single-story office building, maintenance shop, storeroom and other miscellaneous buildings associated with the facility. These include raw material storage, finished goods blending, and packaging facilities for rail, truck, sea bulk and bags.

Products manufactured in the Savannah plant include:

- Fluid catalytic cracking (FCC) catalysts, co-catalysts and additives used by petroleum refiners to convert crude oil into gasoline, other transportation fuels, heating oil and petrochemical feed stocks.

- Kaolin-based microsphere intermediates subsequently used in the manufacture of FCC catalysts and co-catalysts.

- Alumina gel intermediates used in the manufacture of absorbents and hydrotreatment catalysts for the refining, petrochemical and natural gas industries.

Community Outreach:
- BASF is a member of the Savannah Area Chamber of Commerce
- BASF is a member of the American Chemistry Council

Economic Impact
- Annual payroll of $11.2 million*
- Payment of $637,000 in taxes*
- Capital investment of $3.9 million into the facility*

*Year-end 2023 data
