Color Coat
100% acrylic-based coating

USES
1. COLOR COAT can be used for graphics or to change the color of any BASF Wall Systems or other compatible EIFS finish.
2. COLOR COAT is also applied to Base Coat in sealant joints prior to application of the sealant primer and sealant.
   Note: Color Coat is not intended for use as a finish directly over a BASF Wall Systems' EIFS Base Coat and is not recommended for touch-up.

MIXING
1. Mix the contents of the COLOR COAT pail with a low speed drill and paddle mixer until thoroughly blended.
2. A small amount of clean, potable water may be added to adjust workability, but is generally unnecessary since a thick consistency is desired.
3. Additives are not permitted.
4. Close container when not in use.
5. Clean tools with soap and water immediately after use.

APPLICATION
Graphics/color change:
1. Surface must be clean, dry and free of contaminants. As required, rinse wall thoroughly with clean water and allow to dry.
2. Apply COLOR COAT with a 10 mm (3/8") nap roller or airless spray equipment. If necessary, cut in the edges with a high-quality, latex-type paint brush.
3. Brush or roll out in all directions, maintaining a wet edge at all times.
4. COLOR COAT must be worked continuously until a uniform appearance is obtained over the entire wall surface.
5. For two-coat applications: Allow the first coat to dry prior to application of the second coat.
   -OR-
   Apply the first coat as a tack coat; while maintaining a wet edge, double-back with the second coat.

To prepare a sealant joint for sealant application:
1. Surface must be clean, dry and free of contaminants. As required, rinse wall thoroughly with clean water and allow to dry.
2. Apply COLOR COAT to the Base Coat in the joint with a high-quality, latex-type paint brush.
3. COLOR COAT must be worked continuously until a uniform appearance is obtained.
4. Allow COLOR COAT to dry thoroughly (approximately 24 hours) prior to application of sealant primer and sealant.

Advantages

100% Acrylic chemistry provides optimal performance against elements

Formulated to match the sheen of BASF Wall Systems' finishes, minimizes changes in the aesthetics of the building

Smooth coating that makes minimal change to the texture of the wall
LIMITATIONS
1. Protect BASF Wall Systems’ materials during transportation and installation to avoid physical damage.
2. Store BASF Wall Systems’ materials in a cool, dry place protected from freezing. Store at no less than 4°C (40°F). Protect from extreme heat and direct sunlight. Shelf life is two years when unopened and stored as directed.
3. Do not apply BASF Wall Systems’ materials in ambient temperatures below 4°C (40°F). Provide supplementary heat during installation and drying period (at least 24 hours after installation and until dry) when temperatures less than 4°C (40°F) prevail.
4. Protect work from precipitation until dry.
5. Do not apply BASF Wall Systems’ materials to frozen surfaces.

HEALTH, SAFETY AND ENVIRONMENTAL
Read, understand and follow all Safety Data Sheets and product label information for this product prior to use. The SDS can be obtained by visiting www.senergy.basf.com. Use only as directed.

VOC Content
<50 g/l less water and exempt solvents.

For medical emergencies only call chemtrec at (800) 424-9300

TECHNICAL INFORMATION
Consult our Technical Services Department for specific recommendations concerning all other applications. Consult the Senergy website, www.senergy.basf.com, for additional information about products and systems and for updated literature.

WARRANTY
BASF warrants this product to be free from manufacturing defects and to meet the technical properties on the current Product Bulletin, if used as directed within shelf life. Satisfactory results depend not only on quality products but also upon many factors beyond our control. BASF MAKES NO OTHER WARRANTY OR GUARANTEE, EXPRESS OR IMPLIED, INCLUDING WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE WITH RESPECT TO ITS PRODUCTS. The sole and exclusive remedy of Purchaser for any claim concerning this product, including but not limited to, claims alleging breach of warranty, negligence, strict liability or otherwise, is shipment to purchaser of product equal to the amount of product that fails to meet this warranty or refund of the original purchase price of product that fails to meet this warranty, at the sole option of BASF. In the absence of an extended warranty issued by BASF, any claims concerning this product must be received in writing within one (1) year from the date of shipment and any claims not presented within that period are waived by Purchaser. BASF WILL NOT BE RESPONSIBLE FOR ANY SPECIAL, INCIDENTAL, CONSEQUENTIAL (INCLUDING LOST PROFITS) OR PUNITIVE DAMAGES OF ANY KIND.

Purchaser must determine the suitability of the products for the intended use and assumes all risks and liabilities in connection therewith. This information and all further technical advice are based on BASF’s present knowledge and experience. However, BASF assumes no liability for providing such information and advice including the extent to which such information and advice may relate to existing third party intellectual property rights, especially patent rights, nor shall any legal relationship be created by or arise from the provision of such information and advice. BASF reserves the right to make any changes according to technological progress or further developments. The Purchaser of the Product(s) must test the product(s) for suitability for the intended application and purpose before proceeding with a full application of the product(s). Performance of the product described herein should be verified by testing and carried out by qualified experts.
