BASF introduces Renestra insecticide

New insecticide provides robust dual modes of action for broad-spectrum control

RESEARCH TRIANGLE PARK, NC, December 2, 2020 – BASF is introducing Renestra™ insecticide for the 2021 growing season. This new tool provides soybean farmers with a complete solution for controlling a wide range of insect pests and soybean aphids that have developed resistance to traditional chemistries.

Consisting of both a pyrethroid and the unique Inscalis® insecticide active ingredients, Renestra insecticide provides knockdown and residual control of a broad-spectrum of soybean pests, including resistant and non-resistant aphids, as well as a variety of other feeding insects.

“Aphids continue to be a problem for many soybean growers, and Renestra insecticide will give them a unique new option to control these pests,” said Jennifer Archer, Product Manager, Soybean Insecticides, BASF Agricultural Solutions. “This new innovation provides growers with a complete solution for soybean aphids and other troublesome soybean pests.”

Renestra insecticide is a fast-acting soybean product that is easy to handle, provides a low use rate and is a good tank-mix partner. The combination of a quick knockdown and long-lasting residual control of a variety of pests makes Renestra insecticide a good choice for soybean farmers.

Farmers can contact their local BASF representative or authorized BASF retailer for more information.

About BASF's Agricultural Solutions division

With a rapidly growing population, the world is increasingly dependent on our ability to develop and maintain sustainable agriculture and healthy environments. Working with farmers, agricultural professionals, pest management experts and others, it is our role to help make this possible. That's why we invest in a strong R&D pipeline and broad portfolio, including seeds and traits, chemical and biological crop protection, soil management, plant health, pest control and digital farming. With expert teams in the lab, field, office and in production, we connect innovative thinking and down-to-earth action to create real world ideas that work – for farmers, society and the planet. In 2019, our division generated sales of €7.8 billion. For more information, please visit www.agriculture.basf.com or any of our social media channels.

About BASF

BASF Corporation, headquartered in Florham Park, New Jersey, is the North American affiliate of BASF SE, Ludwigshafen, Germany. BASF has more than 18,800 employees in North America and had sales of \$18.4 billion in 2019. For more information about BASF's North American operations, visit www.basf.com/us.

At BASF, we create chemistry for a sustainable future. We combine economic success with environmental protection and social responsibility. More than 117,000 employees in the BASF Group work on contributing to the success of our customers in nearly all sectors and almost every country in the world. Our portfolio is organized into six segments: Chemicals, Materials, Industrial Solutions, Surface Technologies, Nutrition & Care and Agricultural Solutions. BASF generated sales of €59 billion in 2019. BASF shares are traded on the stock exchange in Frankfurt (BAS) and as American Depositary Receipts (BASFY) in the U.S. Further information at www.basf.com.
