BASF introduces Encartis, a new dual-active fungicide for the golf course market

RESEARCH TRIANGLE PARK, NC, July 14, 2021 – BASF has introduced Encartis™ fungicide, a powerful dual-active fairway solution that provides preventative and curative activity against dollar spot and 10 other key foliar diseases.

Encartis fungicide is offered in a new, easy-to-use, pre-mix formulation, combining the strength of both boscalid and chlorothalonil for strong preventive defense and fast curative action. The dual-active solution provides long lasting protection for up to 28 days to help maintain healthy, disease-free playing conditions all season long.

“Encartis is an outstanding fungicide pre-mix and always performed very well in trials at Clemson,” said Dr. Bruce Martin, Turfgrass Pathology Professor Emeritus, Clemson University. “The combination extends the spectrum of diseases controlled while providing defense against selection of resistant fungal strains. I am glad to see this product added to turf managers’ tools for disease control.”

While perfect for fairways, Encartis fungicide can be used anywhere on the golf course, including tees and greens, at any time of the year to control key diseases.

Superintendents can learn more about Encartis fungicide by contacting their local BASF representative.

About BASF's Agricultural Solutions division

With a rapidly growing population, the world is increasingly dependent on our ability to develop and maintain sustainable agriculture and healthy environments. Working with farmers, agricultural professionals, pest management experts and others, it is our role to help make this possible. That's why we invest in a strong R&D pipeline and broad portfolio, including seeds and traits, chemical and biological crop protection, soil management, plant health, pest control and digital farming. With expert teams in the lab, field, office and in production, we connect innovative thinking and down-to-earth action to create real world ideas that work – for farmers, society and the planet. In 2020, our division generated sales of €7.7 billion. For more information, please visit www.agriculture.basf.com or any of our social media channels.

About BASF

BASF Corporation, headquartered in Florham Park, New Jersey, is the North American affiliate of BASF SE, Ludwigshafen, Germany. BASF has approximately 17,000 employees in North America and had sales of \$18.7 billion in 2020. For more information about BASF's North American operations, visit www.basf.com/us.

At BASF, we create chemistry for a sustainable future. We combine economic success with environmental protection and social responsibility. More than 110,000 employees in the BASF Group contribute to the success of our customers in nearly all sectors and almost every country in the world. Our portfolio is organized into six segments: Chemicals, Materials, Industrial Solutions, Surface Technologies, Nutrition & Care and Agricultural Solutions. BASF generated sales of €59 billion in 2020. BASF shares are traded on the stock exchange in Frankfurt (BAS) and as American Depositary Receipts (BASFY) in the U.S. Further information at <http://www.basf.com>.
