Immediate Access to a BASF SDS

Listed below are the various methods for obtaining the most current version of a BASF Safety Data Sheet.

BASF SDSs for North America:

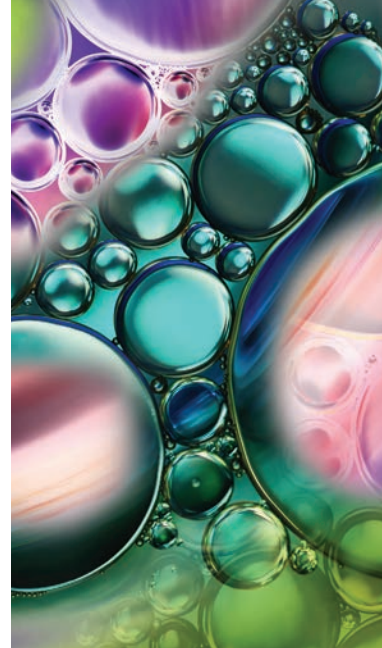

Both public and restricted SDS product search functions are available to BASF customers through our World Account portal. To use either the public or the restricted SDS Search, access the instruction through the following link: www.basf.us/sds

To obtain the SDS for a BASF Automotive Refinish product, go to www.basfrefinish.com. The SDS for BASF Agricultural Products can be found at www.cdms.net. If you can't find what you are looking for, contact your BASF Account Manager for assistance.

SDS Changes

If BASF enacts a major version change of a product SDS, you will receive this updated version automatically with your next SAP order to the email or postal address in our system.

Additionally, at the start of each year, the most recent SDS will automatically be sent out with your first order.

At www.basf.us/GHS you will find information and additional links including the following:

- Link to OSHA GHS website
- Link to NFPA-OSHA Quick Reference Card
- Link to GHS E-Learning Course from ChemAdvisor

This website is your resource for the latest information on implementation of the Globally Harmonized System (GHS) for classification and labeling of BASF products in North America.

Still having difficulties obtaining a BASF SDS?
