

Elyria, Ohio

ADDRESS | 120 Pine Street, Elyria, Ohio 44035-5228

START OF OPERATIONS | 1898

LOCATION | Located within the Elyria city limits, less than one mile from downtown Elyria and approximately 30 miles west of Cleveland

The East Branch of the Black River provides a boundary to the east, north, and west of the site. The City of Elyria business district borders the south side of the site.

SITE MANAGER | Chad Rosin

The site produces consistently high-quality custom and proprietary catalysts.

Products/uses:

- The Elyria site produces a wide variety of base-metal catalysts, both Custom and Proprietary. Primary constituents include alumina, copper, chromium, and nickel. Limited amounts of precious-metal catalysts are also produced at the site.
- Custom catalysts are developed by third-party chemical producers, whose catalyst production is outsourced to BASF on a confidential and exclusive basis.
- Proprietary catalysts are those developed and/or owned by BASF
- Most of the catalysts manufactured in Elyria are used in intermediate Petrochemical and Oleochemical processing.

Community Relations

The Elyria site maintains its relationship as a good corporate citizen within the community by meeting with community leaders and supporting local programs.

Economic Impact

- Annual Payroll: \$18,449k *
- Property Taxes: \$156k *
